THRONGS GREET NATION'S CHIEF IN TWIN CITIES

President's Visit to Norse-American Centenary Wins Northwest's Enthusiasm

PUBLIC RECEPTION AT STATE HOUSE

Four Governors of Norse Descent on Committee Welcoming Presidential Party

ST. PAUL, Minn., June 8 (Special President Coolidge has endeared himself to the people of the northwest. There can be no mistaking the tumultuous reception the Nation's Chief Executive has won by his visit to the Twin Cities, where this afternoon he delivers the principal address of the elaborate four-day program arranged for the centennial gram arranged for the centenntal observance of Norse immigrtaion to

It is not quite three years since Mr. Coolidge, then Vice-President in the Harding Administration, came to address the multitudes at the Minne address the mulitudes at the Minne-sota State Fair. Standing in the same place which he occupies this after-noon, Mr. Coolidge attempted to preach the gospel of Republicanism in this center of "radicalism," but he found an audience impatient to see automobile races and not at all impressed with the presence of the Vice-President of the United States.

A Different Story ever absent—and the record of Mr.
Coolidge has been such as to endear
him to his Minnesota and Dakota
constituents, who now regard him
to be one of the great Executives in

Waying Crewds Along Route

St. Paul and Minneapolis are gayly decorated, ostensibly for the Norse-American centennial celebration but, actually in honor of President Coolidge. All along the route of the presidential train yesterday groups of men and women stood waying, in spite of the fact that no litie effort was made to keep secret the movements of the train. At Adams, Minn, a small junction point, at least a thousand people crowded around the care and at their insistent demands the Chief Executive put in an appearance on the rear platform, accompanied by Mrs. Coolidge and Mr.

PARIS, June 8—Aristide Briand, the Foreign Minister, has made known that he expects to return to Paris from Geneva on Wednesday with the complete approbation of Austen Chamberlain for the proposed French reply to Germany on the subject of the peace pact. So confident is he that it is intended to dispatch the document without delay and it should, according to present anticipations, reach Berlin not later than next week.

This important prospect, which results from a series of diplomatic letters between Mr. Chamberlain and the Marquess of Chamberlain and the Marques of Chamberlain and the Marquess of Chamberlain and the Marquess

signatures of a group of locally prominent Chinese, including Dr. V.

Reports received from Shanghai are reassuring. The outbreak at Chinkiang, where there was some rioting, appears to have been soon frontiers of Germany. Today France over, and no casualties are reported. The abatement of the rioting synchronized with the arrival of the whereas at Cannes it was a restricted American torpedo boat destroyer, pledge. Paul Jones.

Dispatches from Kaifeng, in Tonar Province, report that the strike and the student movement against foreigners have created a serious situation there. Private advices from Taianfu, Shantung Province, say Asiatic Petroleum Company, though not seriously.

LISBON ARRESTS NEWS WRITERS

Authorities' Desire to Conceal Country's Condition Cause of Action

By Cable from Monitor Bureau

LISBON, June 5 (By Mail to London) - The Christian Science Monitor correspondent with the other for eign correspondents here have been undergoing very disagreeable treat-ment at the hands of the police, and have been arrested. Although the British minister's protest to the Portuguese Government had effect of the Times correpondent and homes, they have been only conditionally free, and their days have been occupied between the police court and the British embassy for

the last fortnight. Representatives of the United Press other newspapermen, being Portuguese citizens, had to remain in prison for over a fortnight, but now only one is still under arrest. He is a Spaniard and will be placed on the frontier and forbidden to live in Portugal.

in Portugal.

The accusations were that "mendacious" reports had been sent abroad especially to America, and so the Portuguese authorities thought the best way to find out the culprits was to arrest all the correspondents. The truth is that they do not wish the social and political conditions of the country to be revealed, and this mea-Summarizing the situation with sure was meant to frighten the correspondents into silence.

Loomis said:

"Forty-three states now have the Monitor correspondent's arrest

with a 2-cent tax act effective May 1.

"The states still studying the gas tax proposition include Illinois, Massachusetts, New Jersey, New York, Rhode Island and the island possession, Hawaii."

o a spology. It is not a comfortable situation to be openly threatened with the frontier in this country, where personal guarantees are suspended still, and where it is an undoubted fact that "La Force Prime Le Droit."

LOAN TO ITALY TO STABILIZE VALUE OF LIRA

Morgan Credit, Like Others to Europe, Planned to **Protect Currency**

By FREDERIC WILLIAM WILE WASHINGTON, June 8-J. P. Mor gan & Co.'s \$50,000,000 credit to the banks of Italy is a far more significant transaction that is indicated on its face. It is, in fact, only the latest of a series of transactions during the past year, designed to stabilize European currencies with the aid of American gold. About a dozen different European countries have been thus aided. The United States, quiet-ly and systematically, has been con-tributing toward the restoration of the gold standard throughout the Old World.

The main purpose of these American relief measures, as in the case of Italy, is to keep the currency unit of the country in question from falling to the danger point. The Italian lira has been falling at a rate that threatened serious results. Nothing less than the fate of Mussodeclare, was at stake. If the lira had tumbled another American cent or two in value, a crisis would have ensued in Rome, Milan, and other Italian centers that would almost inevitably have spelled disaster for

the Fascist Government. Loan Bespeaks Confidence credit" for Italian banks, on the lines of the recent \$300,000,000 Federal Re-of Sewickley, Pa. The complete list serve-Morgan credit to the Bank of of lecturers follows: England, appears to be a vote of confidence in Mussolini. Thomas W.

Reconstruction Credits

The amounts listed against the cisco, Calif. more or less sponsor. The \$110,-000,000 credit in Germany's favor is America's share under the Dawe plan of the funds required to put the German reparations bank of issue on a gold basis.

The Italian transaction is particularly interesting because the benefi-ciary is one of our European debtors, in fact, the largest, owing us \$2,138, 543.852, who have not yet funded their obligations to the United States Treasury. The Morgan deal with Italy seems to dispose of a theory irresponsibly put forward in Washington that the Coolidge Administration would "frown" on further advances of American capital to European delinquents. While "revolving credits" are not exactly loans, it is wholly improbable that even would be extended by Wall Street without at least Washington's tacit approval.

Pastor of First Church of Christ, Peter V. Ross, C.S.B., San Fran- Scientist, in Scranton, Pennsylvania, Robert Stanley Ross, C.S., New Bible and Science and Health with Key to the Scriptures to be the Paul Stark Seeley, C.S.B., Portland, Pastor of all Christian Science Churches. He then served as First Reader of that Church until 1902. He is a pupil of our beloved Leader, Bicknell Young, C.S.B., Chicago, Mary Baker Eddy, taught by her in her last class in Concord, New Hampshire, November, 1898, and since that time has been a teacher

of Christian Science. Retiring President's Address Mr. Parker then addressed the eeting as follows:

Friends: This meeting is held in accordance with the provisions of Article XIII, Section 1, of the Church Manual of this Church, by Mary Baker Eddy, which Section reads as follows:

"Annual Meetings, Section 1. The regular meetings of The Mother Church shall be held annually, on required to be present. These assemblies shall be for listening to the reports of Treasurer, Clerk, and Committees, and general reports from the Field.' Our Leader, Mrs. Eddy, in June,

1903, at Pleasant View, received with a spontaneous and very beautiful expression of welcome a large body of Christian Scientists who had come on to the Annual Meeting. You will find her words in "The First Church of Christ, Scientist and Miscellany, page 170. She closed by saying: "To-Lord shall return, and come to Zion with songs and everlasting joy upon their heads: they shall obtain joy

and gladness, and sorrow and sighing shall flee away."

The people to whom Isaiah wrote lived at one of the great intersecting highways of the world. Babylon, Assyria, Egypt and Persia had all used Palestine as a short cut in times of war. The Holy Land, as we call it, had been ground for centuries between the millstones of raiding nations and the Israelites knew both by tradition and by personal experience the horrors of slavery and the joy of release therefrom. To them Isalah's prophecy must have been a vivid word indeed, and as our Leader says, "Today is (it) fulfilled."

I suppose if it were to be known how many here in this house have been ransomed from some form of bondage, the response would turn to this, our home, "with songs and everlasting joy upon our heads," knowing that we have "joy and giadhave flown away.

our new President, I desire to ex-press my appreciation of and my gratitude for the great privilege of being your President for one year, and of having my name in the of officers in our Manual, on the same

COURTS CONVICT 91

OF DRUNKEN DRIVING Ninety-one persons were convicted in Massachusetts courts last week on charges of driving an automobile while under the influence of liquor and four were committed to jail, according to the weekly survey compiled by Frank A. Goodwin, registrar of motor vehicles. Of the six persons who were convicted for the second time for this offense five received jail sentences and appealed and one was committed to jail. Of the 278 driving licenses and registrations suspended during the week 91 were suspended for driving afterdrinking intoxicating liquor.

I Record only the Sunny Hours

New York, June 8 By the Associated Press ORMAN NIXON, chauffeur for a furniture company, who lost \$2248 in cash and checks which he had collected for his employers now is considering an offer that he, his wife and children spend a vacation at the country estate of the man who found the money. The finder returned it just as the loss was reported to the company.

The wallet containing the money slipped from Mr. Nixon's truck Saturday and was found by Philip Wein-stock, a manufacturer who called at Mr. Nixon's home after finding the loser's address on a card in the wallet.

Mr. Weinstock told Mr. Nixon that he noticed his wife and five children seemed to need a rest and he accordingly made the offer for the vacation in Greene County.

voted to hold the 1926 convention in

Portland.

Writes of Cheer American Gifts Have Brought in Europe

In an old castle of Saxony and the beautiful park that surrounds it sev-eral hundred little children, victims of the World War, are being brought back to happiness and normal activity through the contributions of sympathetic Americans.

These gifts were made to Elsa Brandstrom of Sweden when she visited the United States in the winer and spring of 1923 to raise funds for establishing a home in central Europe for children. Under date of Feb. 28, 1925, Miss Brandstrom has sent a report to American friends of the work that has been accomplished

through their generosity.

She relates that in December, 1923. she leased the old castle Neusorge by for the protestants, that he based his Alt-Mittwaida in Saxony for a period valuations of the company's propof 10 years at the rate of \$2500 per annum. The castle, though 200 years

Everything Marked Down into a great inheritance. It may be easy to take title, but it may be difficult for him to possess in any vital sense the treasures which have fallen to him. The Christian faith is one thing to the lad who clasps the hand of Christ. It is the same thing but vastly richer to a Morrison or a Judson, a Gladstone or a Livingstone. To them Christianity was the greatest magnitude in human history and they held that the leaders of the churches should be those who could appreciate and interpret the Christian faith in its fullness and power."

COUNCIL OF WOMEN TO ELECT OFFICERS

Organization of Republicans Cites Year's Progress

Election of officers, revision of rules and reports of committees will occupy the attention of members of the Massachusetts Council of Women at its annual meeting, called for 11 e. m. next Thursday at the Women's Republican Club of Massachusetts, 46 Beacon Street. It will be followed by a luncheon meeting in connection with the Massachusetts Council on Women and Children in Industry.

Drawing its membership entirely from the ranks of Republican women, the Massachusetts Council of Women is the only organization of Republican women which according to state law can act independently from party rule. Thus it can initiate movements whenever it so pleases, and bring its efforts to a successful conclusion.

Mrs. Charlotte E. Wellington of Malden, treasurer, in an interview today said.

"During the last year, the council has forged ahead. It has continued to publish The Massachusetts Elephant which has been found of material benefit to women voters. When ques-tions arise concerning civic affairs, or the Elephant as a reliable source

of accurate information.
"The Council has initiated and successfully promoted corrective legis-lation greatly benefiting conditions for employees obliged to retire from state service as a specific age, has given assistance to the Massachu-setts Civic League in its work of improving the civil service regi and has co-operated with the League of Women Voters in an effort to ob-tain 'fair and impartial' interpretasetts in relation to jury service for

TECH REUNION **BEGINS THURSDAY**

YELLOWSTONE PARK WELTER OF COLOR Luxurious Northern Pacific trains will quicken the delight of your summer vacation in the west.

See Yellowstone Park and its long list of astonishing sights this summer. There is nothing quite like Yellowstone in all the world. Veteran travelers return to it again and again. Described as Nature's wonder park, it is "daily new, always strange, ever full of change."

You can travel there luxuriously on

You can travel there luxuriously on Northern Pacific trains. They take you to Gardiner Gateway, Mont., the northern and original entrance to the Park. Comfortable motor coaches make the tour of the Park delightful. You will see the bears, the colored make the tour of the Park delightful. You will see the bears, the colored paint pots and terraces, the geysera, lovely Yellowstone lake, and then the Grand Canyon of the Yellowstone, described by Kipling as "one wild welter of color-crimson, emeralds, cobalt, ochre, amber, honey splashed with port wine, snow-white, vermilion, lemon and silver-grey in wide washes." This Canyon, the grand climax of a Yellowstone trip, comes in fine sequence if you use the Cody exit of the Park—and, in addition, Cody way brings you out through the thrilling Shoshone canyon into the heart of the Buffalo Bill country at Cody, Wyo.

If you wish to stay at the hotela, the standard Park tour of 4½ days costs \$54—at the camps \$45—everything included. You will enjoy either.

The round trip fare from Boston is \$115.90. Ask C. E. Foster, G.A.P.D., 217 Old South Bldg., Boston, Mass., Northern Pacific representative, for full travel details.

NEW MOTOR LINE

Boston & Maine Service to White Mountains and Portland Planned

Plans for establishing interstate motor coach operations between Bosroutes. It is hoped to have these lines in operation about July 1,

The routes projected in New Hampshire are intended to provide service in new territory or to extend or supplement service now given by passenger trains of the road. It is Boston-Portland service will be diagain stated that there is no inten- rect; the White Mountain service tion of operating motor coaches on will be via Portsmouth, N. H., Inter-lines that parallel the railroad in vale, N. H., and Bretton Woods, N. H.

Approval for Four Lines

The lines for which the approval of the New Hampshire commission QUINCY STARTS Plymouth to Lincoln, traveling via the main highway through Campton,

World News in Brief

Cullacan, Sinaloa, Mex. (P)—A program of road building which will connect all important centers with a trunk line to traverse the State of Sinaloa has been agreed on at a conference that Governor Vega held with the mayors of many cities in the State.

Seattle (P)—Japanese look upon a garden as a picture, beautifully designed and framed, much as the Occidental looks upon a painting, Prof. Takuma Tono, landscape architect of Waseda University, Japan, told

Occidental looks upon a painting, Prof. Takuma Tono, landscape archi-tect of Waseda University, Japan, told Seattle on a lecture tour of the United States. Professor Tono is a graduate of Cornell University. system in the United States will be held Nov. 6, 7 and 8 at Scheneetady, N. Y., officers of the Kappa Alpha fraternity announce. Kappa Alpha was founded at Union College, Schenectady, in November, 1825.

Moscow (P) — American contractors are invited by the Bolshevist Government to rebuild ruined or dilapidated buildings in Moscow. In return for this work the Government offers the Americans possession of the restored buildings for rental purposes for a period ranging from 10 to 40 years. At the end of that term the buildings automatically become the property of the Government. As the Soviet Government has no immediate means of its own to build new dwelling houses, office buildings or other structures, it has adopted the expedient of having foreigners or Russians who possess the necessary means take over ruined or partially damaged buildings for reconstruction purposes.

Rome (P) — Much discussion has been revived concerning the making of the Tiber River navigable from the Mediterranean as far as Rome, at least for freight barges and small tugs. Proponents of the plan argue that the growing population of the capital is beginning to tax the railroads beyond their capacity to bring food and other supplies. If grain and heavy materials could be brought from the sea by water it would relieve the railroads of a tremendous burden, and might even make prices alightly cheaper.

cussion of the Greek situation with a representative of The Christian Science Monitor, emphasized two band concert and a spectacular flag up a more courageous and unified drill by the school children, a chorus nation through the "canalization" or direction of national effort, and the necessity for a continuing economic program for the women and children who cannot be cared for by the agricultural settlement projects.

100,000 Orphans in Greece The most immediate problem, she feels, is caring for the homeless children. According to the latest sta-

tistics, which she brought to the attention of the International Council of Women, there are 100,000 orphans 5100 of these in 40 state-owned orphanages. Private charity provides for 2265 of them in 21 institutions. The Near East Relief cares for

The condition of the women refugees who are unable to do farm tributed 300,000 drachmas for establishment of workshops.

Providing Employment

net courageously. For example, the building up of a foreign market for these hand-made products is a slow process, and distribution machinery imperfectly organized. An effort is being made to build up the carpet industry, but this requires greater development of the wool and spinning factories. There are about 2000 ms at present, and it is hoped by expenditure of private capital, to build up the industry slowly to 10,000

The outstanding feature of the refugee work has been, of course, the colonization of these homeless people in agricultural projects. Under the £10,000,000 loan, this work is proceeding rapidly, especially in Macedonia.

Greek Government Active Asked how the Greek government was handling the situation. Madame Pappadimitriou declared enthusiastically that the response of officials and private citizens has been "won-derful." The great expenditures in-the campus elms to light the various

DECLINES GOOD ROADS POSITION

Governor Fuller Says He Is Opposed to Paternalism by United States

and believes that "the centralization special prizes for spinach went to of power can be greatly overdone," today in which he declines to accept his election to the vice-presidency of the United States Good Roads As-

In his public letter to J. A. Rountree, director-general of the Good Roads Association, Governor Fuller

I have at hand your letter of May fourteenth in connection with the Thirteenth Annual Convention of the United States Good Roads Association which met at Houston Texas, April 20-25.

You say in your letter that the

You say in your letter that the Convention went on record as favoring the continuance of Federal ald and asking for an increase of appropriation from \$80,000,000 to \$100,000,000 also favoring the building of permanent system of highways throughout the Nation.

I further note and appreciate the honor you paid me in electing me Vice-President of the Association to serve during my term of office, and in this connection I shall have to say to you that I could not in good conscience accept the honor, because I am opposed to paternalism on the part of the federal Government at Washington.

I am opposed to the Government

I am opposed to the Government taking the money of the taxpayers and offering it as an inducement to the Governors to take more money from the taxpayers for certain pro-positions such as roads. I do not mean to say that a good many of these road building projects are not these road building projects are not worthy, but I do say that this gradual gathering of power by the Federal Government is a mistake and should not be favored or permitted. It is a dangerous tendency which has great possibilities for disaster.

The centralization of power can be greatly overdone. It has been overdone in many instances with the eventual result that a wise and rea-

eventual result that a wise and reaaonable supervision has given way to bureaucracy that leads to waste, extravagance, duplication and unfair taxation, and all the ills that follow from such an unwarranted taking over of power that should reside in local government.

Special Correspondence HE most obvious effect on the passenger rates, the companies supply figures which show in graphic fashion how great has been the delaw is the large number of "To cline in traffic. signs on offices formerly occupled by ticket agents all over Europe.

The law has been a heavy blow to the companies, by far the worst they ever sustained, with the exception of ever sustained, with the exception of to 805,228. In 1922 the first quota their tonnage losses in the war, and law took effect, limiting the number they are at their wits' end to find a solution for the present situation. Already a great many ships have been laid up and many more will soon be withdrawn from service.

It is well known that the profit in transatlantic business has always been in the heavy third-class traffic. This traffic is today almost completely gone, in spite of the fact that the old open steerage no longer exists and third-class acommodations ost ships are equal to that obon most ships are equal to that ob-passages at the minimum rate of tainable in the first class only a few \$87.50, they have suffered a loss in

Hesitate to Risk Visas

The situation is even worse than a number of other factors, the most the companies anticipated when the law was first passed, because there 1900 was \$850,000, in 1812-class sings in 1900 was \$850,000 in 1913 and is now are hundreds of thousands of foreign \$1,500,000 born people in America whom the \$5,000,000. steamship companies regard as likely to make a trip some time or other to
the land of their birth. This traffic develop business to offset that lost was very large and very profitable until recently, because in almost all particularly, with Italy, it progress. Travel is necessarily so meant the sale of a round trip ticket expensive that only a comparatively with the return being made from the small number of people can be inter-same port, an important point to the ested at present rates. The United company. However, as was inevit- States is looked upon as the only able in the case of a new and stringent country large enough and rich law, some visitors to Europe from enough to supply tourist traffic for America have found it impossible to Europe in large volume, but the ships obtain return visas, and this news, already affoat have an abnormal spread in the foreign language press amount of space devoted to thirdin America, has deterred thousands class quarters and it is hard to get from making European visits for Americans to travel third class, notfear they might not be able to re-turn to the United States. withstanding the fact that third class on the good ships is now a perfectly

French Tourist Taxes

At the moment when steamship companies need every passenger they can get, developments in France, es- day that the Tremont & Suffolk pecially in Paris, have made rep- mills where night work in the proresentatives of the companies feel duction of its new lines of regular very bitter toward France. France fabrics has been the rule since March the great magnet for American 1 have unfilled orders that have not tourists in summer, as Italy is in winter, but the evident determination of the French to make the tourist carry a disproportionate amount of French taxation is causing prospective tourists to stay at home or seek some other country. It is feared that "See America First" will be revived in such a manner as to work more havoc with the steamship business.

Italy, on the other hand, has made the first move toward smoothing the path of the tourist. The passport restrictions have been greatly modified.

The unspeakable nuisance and

great expense of the passport system is sharply impressed on American visitors to Europe. The United States seems to be the party responsible for the trouble and money entailed by this system and it is difficult to see what can come out of it except harassment. Every country retaliates by charging Americans the standard American rate of \$10 for a visa, so that a trip across many borders soon runs into real money. The writer saw the passport of an American steamship agent in Vienna whose business requires him to travel frequently through central and eastern Europe. His passport had just reached the end of its two-year validity and represented a little more than \$1100 in visa charges. He had obtained a new one and was prepar-ing to make a visit to Hungary and Rumania. The visas for his trip came

Losses in Numbers

The most recent dependable in formation as to the immigration law's effect on the steamship companies is contained in documents which have resulted from the controversy between the Canadian Government and the steamship com-

That there should be an empty chair and that that chair was tempt to distinguish between Gerregarded as the pioneer of moder-nity, is therefore exceedingly regret-table. The exhibition remains incom-

Nevertheless, hundreds of thousands of American citizens will pass through the portais of the Paris Exhibition this year, and Herbert Hoover, United States Secretary of Commerce, has arranged for an of-ficial committee, under the presi-dency of Charles R. Richards, di-rector of the American Association of Museums, to visit and report on the French enterprise. It is certain that they will go back delighted with hat they have seen and that al-lough America declines to extend its fluences to Europe, Europe will in-uence greatly American art.

Important Results Expected

Important Results Expected
Every international show is responsible for profound changes in the tastes of peoples. For better or for worse, the world will, in matters of decorative art, be influenced by Paris for a number of years to come.

What one observes above all in a stroil through the grounds, which extend from the Grand Palais across the Pont Alexandre III to the Esplanade dea Invalides, is the entire disregard of the past. This does not mean that without the past the results that are apparent today could have been achieved. What it means is that no longer does the sense of the academic fetter artists and craftsmen.

A More Handsome Industrialism

There is even in the mistakes of the earlier struggles of modernism a great deal that will prove helpful. Those who scoff at Cubism and Fundamental and the handsome of the structure of the structu turism and the hundred other isms, should not forget that they are not to be considered as ends in themselves, but only as the tentative steps away from an oppressive traditional-ism that has largely lost its meaning for the new world of radio, of air-planes, of towering architecture, of

Urbanism, which is a harder name for town planning, is, as it is now or town planning, is, as it is now inderstood in Paris, something quite ew and it seeks to avail itself of all ecent discoveries, to apply the arts in accordance with the demands of industry. The period of crude indus-trial development is passing and we are entering the period of a more

his is perhaps the main lesson ich is to be learned from the Paris Hitherto research, which large fields and has made reamed of industries, has in the increase of material without regard to beauty. ly, there has been an appalling faces. There was a possibility that stincts, but it was not by a return to an earlier century that salvation was to be found-it was to be found only

to contribute its own work, will do much to transform industrialism and to point the way to a new civilization. It is to the credit of France that so soon after a tremendous war the nations of the world were invited to reflect on the moral and social value of living art. The phrase "living art" should indeed be stressed. The last century erred in refusing to live in its own time, in trying to revive what belonged to an earlier time. Hence the mock classicism which had no living inspiration; hence the recent living inspiration; hence the recent reaction by those who discovered the simple truth that each period really distinguished in the arts has endeav-

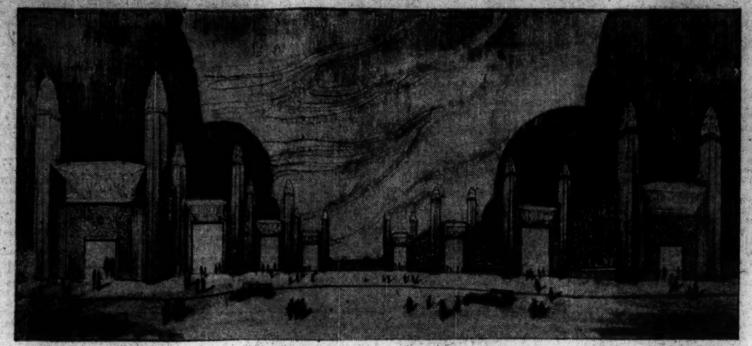

The nineteenth century presented an impossible anomaly. It encouraged an anachronism. It condemned itself to live in the bric-a-brac of the past. The age of the railroad, of the telegraph, of the automobile, slept in a Louis XVI bedroom, dined in a Henri II dining room, and held receptions in a Louis XV salon. There are those who begin to protest that there is an inartistic contradiction between these two pheasurements. between these two phases, and who a curious change has come over offi-

A sedan chair demanded its own kind of ornamentation: the automo-pile demands another, and that other A sedan chair demanded its own kind of ornamentation: the automobile demands another, and that other depends more upon the right use of the line, usually sober but admirably adapted to its purpose, than did the sedan chair. One sees throughout the exhibition, especially on the architectural side, the better modern use of the straight line, the better disposition of masses with a view to harmony.

Germany Also Absent

If it is exceedingly unfortunate that the United States should be

CHINESE STUDENTS EXPRESS THEIR OPINION OF THE MONITOR

Youths in the Journalism Department of the Peking University Read and Analyze American Newspapers-Experiment Is Interesting

PEKING, May 7 (Special Correspondence)—The department of journalism in Peking University is just nalism in Peking University is just now engaged in an interesting experiment. The students, who are all English-speaking Chinese, are reading and analyzing a number of representative American newspapers, and they have written short papers, giving their impressions. The following articles are reproduced from the pens of the students, and all deal with their impressions of The Christian Science Monitor:

Tao Shih Fen writes:

The name of this paper to the

Tao Shih Fen writes:

The name of this paper to the general reader is certainly somewhat misleading; but any intelligent, person who is fair-minded enough to read through a couple of issues of the Monitor would agree that it is beyond doubt one of the leading papers in the United States. To me it stands proudly on the peak of purity and dignity. As I bring home my thoughts, I conjecture that the Chinese families would like such paper as this for the clean news and features, human and instructive. However, the Chinese public would care little for international would care little for international news; we are not as yet trained to think of the world as we are not in think of the world as we are not in the whirl of commerce, transporta-tion, etc. But a paper of a national character would be thoroughly wel-come if distribution should be made efficient in spite of the present diffi-culties in all means of transporta-

International-News

Tu Lien Che writes:

The one distinguishing thing of The Christian Science Monitor is that it contains a large proportion of international news. And it is no wonder to call itself "an international daily newspaper." It has many special departments, as art, radio, educational, the home forum, editorials, etc. It is constructive in character. Stories which play up the bad phases of human life, as crime, etc., are absent, and in contrary, stories as about the world essay contest, or methods to relieve traffic, etc., which are constructive and helpful to social welfare, are emphasized. It is an international and constructive paper. Tu Lien Che writes:

No Crime or Sensation

Livingstone C. Chao writes: The Christian Science Monitor one of the greatest newspapers in one of the greatest newspapers in America. . . It is the newspaper that contains most news and inter-national articles. . . there are no criminal and sensational stories in this paper. It plays up human inthis paper. It plays up human in-terest and feature stories; it, there-fore, has historical things and literary writings, as well as picture section in each Tuesday. . . It is widely circulated, so although it is published in America, it has a page of advertisements from England and classified advertisements on states It has 20 pages per issue and puts its editorials in the last page. It has long editorials on the discus-sion and criticism of those subjects that are either on international questions or of the constructive

"Energetically Convincing" Chao Hsi Yu writes:

The Christian Science Monitor is one of the most popular and best newspapers not only in America but really in the whole world. It collects news from every corner of the earth and is therefore international in its scope. With the purpose of being constructive, the paper has been trying to play down sensational news as much as possible. Among its developed departments are the forum, and the art news and coming. The Christian Science Monitor differs from other American papers in that its editorials are very seri-ously made and are energetically convincing.

Kuan Chunglin writes:

Kuan Chunglin writes:

The Christian Science Monitor is one of the greatest newspapers in America, having subscribers not only in America, but also in Europe and even in Asia. Though the paper is so named, it is not at all an organ for propaganda work for the Christian Church, but is, as they themselves term it, an "international daily newspaper." It is of conservative type: headings are in quite moderate size printing; no very big advertisements; there are always articles discussing things moral or intellectual. Editorials appear on the last page and discuss serious subjects only, and are not signed. It is a clean paper.

Huang Chin Jung writes:

Huang Chin Jung writes

Huang Chin Jung writes:

Looking through The Christian Science Monitor, one is ready to form the opinion, that this paper, if not the greatest, is one of the greatest organs in the world, for it deals with news from almost every corner of the globe. In contrast with other newspapers, the international news is played up about equal proportions in the different sections, as well as in the editorial. Other distinctions it has, that it gets advertisements from every country and city; the editorial occupies the whole back page, not common to many papers. This editorial page consists of several articles commenting on different topics of the day, national as well as international.

RUMANIAN CURRENCY DECLINES IN VALUE

Fall Directly Traceable to Collapse of Grain Prices

BUCHAREST, May 14 (Special Corespondence)-The recent decline in Rumanian exchange from 180 lei to 220 lei to the dollar is directly traceable to the world collapse in grain prices. Although the only grain at present permitted for export from Rumania is maize, there are close on 1,000,000 tons of this grain available for export from last year's crop. The maize export season from Rumania usually begins on the reopen-ing of the River Danube in March and runs well into the summer. High prices for grain on the world's mar-kets in the early part of this year led Rumanian banks to loan heavily against an assumed ready demand or Rumanian maize when the export

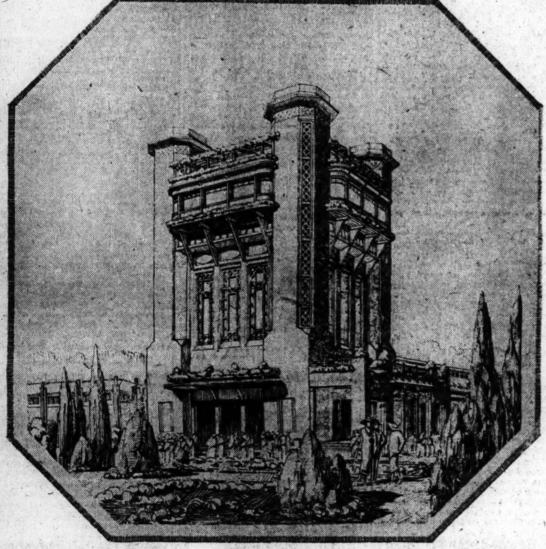

eason began. The collapse in prices, however—coupled with the fact that all grain shipped out of Rumania must stand heavy export tax-makes it quite impossible for Rumanian exporters to compete against foreign maize. in Constantinople at a price considerably below what Rumanian exporters are able to quote.

The immediate result is that the

farmers are not able to meet their maturing bank loans, and an already siderably aggravated. Unless there is a speedy improvement, the scarcity of credit available for agricultural purposes will have a serious effect on the coming crop season in any event, is none too promising, sown to wheat last autumn.

ANNUAL REPORTS ARE READ IN THE MOTHER CHURCH

(Continued from Page 1)

page with our Leader, whose directions, teachings, and the influence of whose life will keep our feet in the pathway showed by Jesus, up to the understanding of the allness of God. New President's Address

Mr. Parker then introduced the new president, who spoke as fol-

Friends: In view of the fact that it is now fifty years since "Science and Health with Key to the Scripwas given to the world, it is fitting, lest we forget, that we conider the Christianity of Christian Science and of our beloved Leader, Mary Baker Eddy, its author.

From a child, Mrs. Eddy was fa-miliar with the Christianity of the Puritans, and lived it. And it was through her fidelity to the most spiritual type of Puritan Christianity that God graciously prepared her to receive the Revelation of Christian Science. If a student wishes fully to understand Christian Science, he must see to it that his morals, and even his secret thoughts, are beyond reproach. There is no other way "under heaven given among men," whereby the spiritual import of the and demonstrated. If any one who is deceitful, sensual, or devilish should learn the letter of Christian Science and repeat it perfectly, he could not transformed him.

With the revelation of Christian Eddy, came the advent of a higher Christianity than that of the Christian churches of her time, a Christianity which, like that of Christ Jesus, was accompanied with the spirit and power of Christian healing. Referring to the great exponent of Christian healing, Christ Jesus, Mrs. Eddy writes (Science and Health p. 52): "The 'man of sorrows' best understood the nothingness of ma-terial life and intelligence and the nighty actuality of all-inclusive God, points of Mind-healing or Christian Science, which armed him with Love." And, again, she writes of him carry out his holy purpose, he must be oblivious of human self."

Now these are the essential features of that Christianity which was Mrs. Eddy is the Discoverer and exemplified in the Christian career our beloved Leader, and with students who followed her as truly Leader. As little children they as she followed Christ. No more re- her accents of love, drink at markable thing has happened in this remarkable age than the way in hands in hers that she may truly lead which Mrs. Eddy's teachings have them. Obedience to her teachings evangelized, and are evangelizing, such students of hers as were Christian enough to receive this blessing.

entist the highest the present world It is in this, that by perceiving, as Jesus did, "the nothingand the mighty actuality of all-inclusive God, good," and by under standing the infinite allness of Life. Truth, and Love, and the consequent nreality of sin, sickness, and death, they heal the sick.

Worthy though the Christianity of people in all other churches may be. it is not yet equal to healing the sick by means wholly spiritual and under-stood as Science. But the time is for The Christian Science Monitor, coming when all Christian churches and of other equipment needed by will understand Christian Science as The Christian Science Publishing exclusively taught in the writings of Society, at a total cost of \$278,062.78. in all other respects. For finally every knee shall bow and every tongue shall confess that artificial final to the Real Estate Final to the Real power is paramount.

breaks the morning light came the revelation of Christian Science to the pure heart of our beloved Leader. As a "scribe under orders" (Miscellaneous Writings, p. 311) she wrote Science and Health, and all the other books that have come from her pen Mrs. Eddy herself taught a class of May 31, 1924, \$131,731.17; receipts 70 people in November, 1898. To the during the year, \$430,384.98; expendisubstance that she never allowed May 31, 1925, \$169,677.57. tion except when she was in the spiritual consciousness that would ceipts during the year, \$17,568.08; heal those pronounced incurable, or expenditures, \$19,605.20; balance on those with few human comforts and recover the dying; and that an imhand May 31, 1925, \$111,015.76. Health and her other writings, was impart to the readers enough of her own spiritual sense of existence to Christianize them and heal them.

The revelation of Truth is complete and final in the writings of Mrs Eddy; and because it is complete and final, another revelator can never appear. Sincere Christian Scientists, perceiving the completeness and finality of the revelation, will demonstrate its Science. In Mrs. Eddy's tatement of it, the completeness and finality of the revelation is such that it would be impossible to state it more clearly, more simply, or in a way more easily understood by be-ginners than is done in her writings. To be a safe guide for the student, the revelation had to be accurately stated; and in the writings of Mrs. Eddy it is accurately stated. All writings on the subject of Christian Science which set forth misconceptions of what Mrs. Eddy has written or which record ecstasies of the intellect devoid of inspiration, or which may be dishonestly written, tend to deliver him hopelessly to the liabili-ties of disease and death.

In regard to books or writings other than those which Mrs. for current bills, this obligation is Eddy has written and which purport the only indebtedness against The to elucidate Christian Science, it must is needless. If their attempted elu-cidations differ in the least from tian Science Benevolent Association what Mrs. Eddy has written, they are or The Christian Science Pleasant not Christian Science and should be View Home. carefully avoided by the student who would escape disaster on his way to long life, and peace.

Mrs. Eddy has written a By-Law on without exception, to every membe llows: "The Bible, together with dence and Health and other works Mrs. Eddy, shall be his only text-

definite intention; and the intention throughout the years to come, against the adulteration of the teachings of Christian Science and the eventual loss of Christian healing as set forth and explained in her works. The as-sertion on the part of a student that in reading other books on the subject of Christian Science he does not read them as textbooks for self-instruction, does not free him from the fact that he reads them in no other way and in preference to those which Mrs has written, obviously the Christian Science periodicals are in cluded in what Mrs. Eddy has author ized and provided for, and the func

for the movement.
Christian Science embraces Christianity the purest and the mightiest the world has ever known rapidly spreading over the face of department of human affairs. Through the individual Christian lives of those who are healing the sick in accordance with Christian Science, we fee the presence and can reckon the progress of the most beneficent influence experienced upon the earth since the days of the apostles. Mrs. Eddy's teachings were op-posed by some of the scholars of this

world. Nevertheless, it must always be borne in mind that, when they sneered, ridiculed, misrepresented and denounced, their assaults were always aimed directly at her docwill outlive the scoffs of all time. Calm, serene, and certain, Eddy carried her discovery into the Christian hearts of the whole world She carried it there past every obthe truth until it had stacle that evil natures could devise and during her lifetime one of the most subtle, insidious and diabolical Science to our beloved Leader, Mrs. devices against her discovery was the spurious literature circulated among her followers by the enemy. Mrs Eddy defended her discovery against its enemies without bitterness in her heart, without resentfully answering personal charges, and without doing injury to those who sought to destroy When she was reviled she reviled not again, but, as the Bible says, committed herself "to him who

In spite of the years of misrepremighty actuality of all-inclusive God, sentation, slander, and abuse, the good. These were the two cardinal character of our beloved Leader has steadily risen in the estimation of the whole world. And Christians have come to regard it as the strongest (Miscellaneous Writings, p. 162), "To the gentlest, the most beneficent and most Christian influence that has appeared since the time of Christ Jesus. To all loyal Christian Scientists Founder of Christian Science. them she is the wonderful revelator, which were evangelized those of her the marvelous Teacher, the beloved her accents of love, drink at the fountain of health, and place their will clothe them with the Mind of Christ, strengthen them with the might of omnipotence, and carry But wherein is the Christianity of them in everlasting arms through the spiritually-minded Christian Sci-Treasurer's Report for Year Ending

Respectfully submitted EDWARD L. RIPLEY

Mr. Paimer, the Cierk of the Church, then read the annual report of the past year's work in the numerous branches of The Mother Church activities, as follows:

All is well with The Mother Church. All is well at the headquarters of The First Church of Christ, Scientist, in Boston, Massachusetts.

You who fill this great and beautiful auditorium are only a small part of the members of The Mother Church who, it not present in person, are with us in spirit, and aware with

auditorium are only a small part of the members of The Mother Church who, it not present in person, are with us in spirif, and await with us in spirif, and await with deager expectancy the reports of this Annual Meeting.

Great prophets, seers and teachers have arisen in times past to point the way and lead to God. The prophet, seer and teacher of the modern world is Mary Baker Eddy. To her was revealed the aliness of Spirit, the perfection of God and man. To her was revealed the utter futility, the unreality of matter, sin, disease and death, and everything opposed to the divine nature. She founded her Church on the words and works of Christ Jesus, and called to a world asleep in dreams of dogma and material speculation to awake and prove the power of God by doing the works of Christ Jesus, and not only to preach the gospel but to prove it, by healing the sick. Her purpose in founding that church is clearly set

entist, in Boston, Mass., is designed to be built on the Rock, Christ; even the understanding and demonstration of divine Truth. Life, and Love, healing and saving the world from sin and death; thus to reflect in some degree the Church Universal and Triumphant.'

And so today The Mother Church, the church founded by Mary Baker Eddy, meets in annual session in obedience to the Manual she gave us You will hear reports of progress, you will hear reports of victories, you will hear reports of victories, and we are sure you will go away to your homes and fields of labor knowing that The Mother Church is faithful to the teaching and vision of its inspired Founder

dear people seek this membership? The reason is easy to find. Their eyes have been opened to see the love, tenderness and healing power of allembracing divine Love. They have been healed of all manner of human ills, of discord, sin, poverty, hate, disease; and many of them have been snatched from the very jaws of death. They have seen through Christian Science the vision of the Life divine in which death has no part. They have been awakened to the fact that the kingdom of God is here and now, that the Comforter able, bringing surcease from cin and sorrow. They see themselves now the sons of God; and they rejoice in love Christian Science because it has brought to them the priceless gift of spiritual freedom.

Christian Science heals, Skepticism can never reverse that glorious fact. It heals by the spoken word as well as by silent prayer; its regenerating and healing power not only is re-deeming the sick and sinning, but is uplifting and leavening all phases of human thought. Natural science, theology, medicine, politics, literature, the fine arts, all are being lifted to new, higher, and better levels through the application of Christian Science to the affairs of men. Did not John perceive the power of the Christ, Truth, to lift human thought out of itself into realms of spiritual truth and goodness when he heard a voice from heaven saying, "Behold I make all things new"?

God has blessed The Mother Church and its branches. The Cause of Christian Science is highly prosperous. Our churches are prosperous divine will. The Mother Church and its branches are proving their faith by their works. Christian Scientists rejoice in the prosperity of Christian Science, and they pray for and look forward to that glad day when all men will grasp the demonstrable Science of God and man, foretold by the prophets and Christ Jesus and given to the world by our beloved Leader, Mary Baker Eddy. "And there shall be one fold and one

shepherd." The Sunday School

Under the protecting wings of the Sunday School of The Mother Church home, the fatherless and motherless true Father-Mother; while some with too many, are eating together the spiritual bread which alone can satisfy child and man.

In simplicity and gladness tiny tots and unfolding youth are learning through the lessons provided in the Manual of The Mother Church, to love, understand and express in daily living the purity and grandeur of the Christ idea. "Beloved children," writes our Leader, "the world has need of you . . .: it needs your in-

nocence, unselfishness, faithful affec-tion, uncontaminated lives." (Miscellaneous Writings, p. 110). Ah, how truly the world needs them for its healing and redemption! A privilege, deep as dear, has the Sunday school teacher in preparing these mes-sengers of Love for their world work, —the sacred ministry of Christian Science.

The Board of Lectureship The activities of the Board of Lec-

tureship continue to be an index to the growth of the movement. Steady increase is to be noted in the number of lectures given and in the attendance and interest. Throughout the world the lecturers have been re ceived for the most part by large and enthusiastic audiences. In some instances even the use of amplifying devices has failed to accommodate tidings of great joy, which shall be to all people." A large number of lectures has been radiocast and the response from the highways and by-ways reveals the incalculable healing and saving results to be obtain through this breaking down of limitation. The spoken word permeated with spiritual understanding has power to heal and save. Healings frequently take place during a lec-ture and lecturers often receive letters of gratitude and thanksgiving for the freedom thus gained. During the year ending May 31

1925, 3257 lectures have been given.
The approximate attendance at these lectures was 2,580,160. Of these lectures 2945 were given in the United States and Canada, and 312 in distant fields.

Mother Church, and hundreds and thousands of happy Christian Scientists all over the world look to this meeting with joy and gladness. You who fill this great and beautiful Holland, Italy, Norway, Sweden and and the power of the Literature Discounties. During the year the sanatorium provided for more than 1600 guests. In addition, relatives and friends accompanying the guests were in many instances accommodated. The

The work of the Literature Dis-The work of the Literature Distribution Committee is one of the ways through which the world is learning of Christian Science and what it is accomplishing. The work increased during the past year, and a number of new workers were number of new workers were lided to the Committee. We realize that love for God and man is the basis of our distribution work, and that through the distribution of literature the fruth as given in the Christian Science textbook is reaching many who are hungaring and thirsting for righteousness.

Christian Scientists in Germany, Russia, Austria, Estonia, Italy, Jugoslavia, Latvia, Caechoulovalia, Ukraine, Danzig Free State, Rumania, Poland, and Finland have been given funds or have been added in the purchase of Christian Science churches and societies in Germany, Russia, Austria, Estonia, Italy, Jugoslavia, Latvia, Caechoulovalia, Ukraine, Danzig Free State, Rumania, Poland, and Finland have been given funds or have been added in the purchase of Christian Science churches and societies in Germany, Russia, Austria, Estonia, Italy, Jugoslavia, Latvia, Caechoulovalia, Ukraine, Danzig Free State, Rumania, Poland, and Finland have been given funds or have been added in the purchase of Christian Science churches and societies in Germany, Russia, Austria, Estonia, Italy, Jugoslavia, Latvia, Caechoulovalia, Ukraine, Danzig Free State, Rumania, Poland, and Finland have been given funds or have been added in the purchase of Christian Science churches and societies in Germany, Turking, Christian Science churches and societies in Germany, Italy, Jugoslavia, Latvia, Caechoulovalia, Jugoslavia, Latvia, Caechoulo

hirsting for righteousness. In May, 1924, this Committee a meeting in The Mother Church in the interest of our periodicals. The inspiring talks given at that meeting have since been read at similar meetings in 150 branch churches and cieties throughout the world. Unsocieties were greatly encouraged and inspired by hearing these ad-dresses. In January of this year another helpful meeting was held which was productive of much good.

Committee on Publication During the past year, the editor of newspapers and medical periodi-cals have shown a growing disposi-tion to be fair toward Christian Science and toward its Discoverer, Founder and Leader, Editors of religious periodicals and publishers of books have not made as good of books have not made so good a record. On the whole, however, edi tors and publishers are increasingly able and willing to detect and eliminate, or to allow the correction of. nisrepresentations concerning Christian Science or Christian Sci

It is to be observed, also, that the ree distribution of our literature.
\$32,466.99 were expended to assist are being tested in a way that presents added or new difficulties for discernment and fairness of editors them. They are now obliged to scrutinize what is offered to them by persons claiming to be adherents of Christian Science. They now need to distinguish between what is being ione by the followers of Mary Baker Eddy and what is being done by othr persons and their followers in the name of Christian Science and with the unctuous use of her name. In this situation, the attitude shown ditors, with few exceptions, has furnished cause for grateful appre-

ciation. Of course, it is for loyal Christian Scientists, first of all, to discern between what is genuine and what otherwise; between what will carry on the movement founded used for making Science and Health, our Leader and what would lead it available for the blind. Also The other directions. In all probability our Leader and what would lead in Christian Science Monitor has been that which now is plainly an attack upon our church will soon become more plainly an attack upon her and upon the healing which is the dis-\$121,762.30 were paid to 47 branch tinctive feature of our religion. Among the many comments on

Mrs. Eddy which were printed during the past year, the following is quoted. partly because it is from a distinguished clergyman who disagrees in ome respects with her teaching. This quotation is from an article in a church paper by the Rev. James Black, M. A., D. D., of Edinburgh, who said: "I admire Mrs. Eddy, the Founder of Christian Science, in deep ways, and I frankly consider her one of the most remarkable people in religious history. She has founded a great Church: she has left her mark for good on countless lives: indeed she has affected our generation more than any other single man

response of the field to the call for funds has been most gratifying, and we take this occasion to thank heartily the donors.

The Christian Science Publishing

The Trustees are grateful for splendid support from the field and for the general growth of the Pub-lishing Society. They are thankful, too, for a substantial increase in net profits, all of which have been paid Church as provided by the Church Manual and the Deed of Trust. The growth in the circulation of the periodicals has been steady and the highest point except for the war period of the Monitor. The Monitor losses for the past twelve months have been considerably reduced. The Trustees find encouragement in the fact that a small profit has been shown in three of these months, and they believe that with the continued co-operation of the field a further progressive financial showing will

us to render better service to the vened during the past year did not other facilities, we are able to pro-

a goodly number of bills, for the reason that these bills would have German Hymnal, a French translation affected Christian Scientists and of "The Life of Mary Baker Eddy," by Sibyl Wilbur, a large size Re ers' Quarterly, and also the Timothy Cole engraving of Mary Baker Eddy The illustrations in the book, Mother Church," by Joseph strong, have been improved, and pic-tures of the windows in the original Mother Church have been added to it.

During the past year the editorial policy of The Christian Science Monitor has won for it recognition as a worthy leader in the advocacy of three great moral issues. No oth er newspaper in the United States has stood so forcefully and so un-flinchingly in support of the policy of prohibition of the liquof traffic as has the Monitor. It is recognized by all prohibition forces as their most able ally and champion. Nor is this in-fluence confined to the United States alone, since its world-wide band of correspondents have been instructed to send all news regarding the extension of temperance sentiment and he enactment of legislation for restriction of the liquor trade. The international character of the paper, emphasized as it is by the great volume of its foreign news,—news always of progress and of the better side of life,—has made of it an establishing bases for international peace and harmony. The Monitor's peace plan has been steadily grow-ing in the favor of the public, has been discussed not only in the American Congress, but in the British Parliament and the French Chamber of Deputies, and will come up for definite action at Washington at some time during the coming winter. To prohibition and peace the Monitor has added, as its service to mankind, advocacy of clean journalism. Its criticisms of the tendency on size crime, scandal, and disaster have resulted in making this a

truly national issue. Newspapers all over the United States are discussing it; many have made tentative efforts to correct present pracards set by the Monitor; schools of ards set by the journalism are discussing the issue, and the periodicals devoted to news and the periodicals devoted to news of the press, as well as more popular periodicals, are giving it liberal space. It is in no sense an oversatement to say that this active discussion of this moral issue, so fraught with importance to the social life of the nation and to the purity of the American home, has proceeded in the main from the active campaign against evil waged by The certain Science Monitor.

By changing to eight columns instead of seven, the Monitor has adopted the standard form of other active the standard form of other their prayers and praises to God.

Eight Churches in Cleveland, journalism are discussing the issue; and the periodicals devoted to news

The religious articles on the house from page now regularly appear translated into ten languages, as follows: French, Swedish, Spanish, Danish, German, Norwegian, Russian, Dutch, Italian, and Greek.

On April 1 the Monitor adopted the plan of publishing three issues of the paper,—the Pscific edition, Central edition, and Atlantic edition.

Under this arrangement, an advertiser is enabled to use at different rates one or more issues of the Monitor which will best suit his needs. This is an innovation in newspaper advertising, and is being watched with interest by other publishers. During the short period in which the plan has been in operation, it has proved to be an unqualified success. The special feature editions, devoted to the Monitor Peace Plan, as well as to various localities, have been warmly received, widely circulated, and have caused much friendly comment by other newspapers and periodicals.

The request made at the last Annual Meeting that branch churches develop, from within their brganisations, programs for meetings held in the interest of our periodicals has proved valuable, and has enabled our Monitor advertising and news representatives to devote more of their time to the business of getting out a good paper.

Requests still come for reprints of certain editorials or articles. It is also and the articles and the articles is a feel with the articles in the larger sum necessary for further developments.

Requests still come for reprints of certain editorials or articles. It is difficult for one to judge any newspaper or magazine from a single article; and experience has shown the desirability of circulating the entire paper.

Literature Circulation and Distribution Committees are doing efficient intelligent, unselfish and needful work. The Mother Church and branch church Reading Rooms are cheerfully accepting and forwarding subscriptions to the periodicals.

The Trustees feel that they are giving voice to the general thought of the field in expressing appreciation of the devoted work of the Bible Lesson Committee.

There is manifest in the Publishing Society an appreciation of and devotion to the high purpose for which our Leader established the Christian Science periodicals, including the field will be required to provide the larger sum necessary for further developments.

The services of The Mother Church are radiocast the first Sunday of each month. This new activity was started last September. Many letters of appreciation of this service have been received, some of them from distant points.

There is manifest i

ing Society an appreciation of and devotion to the high purpose for which our Leader established the Christian Science periodicals, including The Christian Science Monitor, these evangels of the Christ, Truth, and that appreciation and devotion is manifested in a true sense of helpfulness and co-operation among the workers.

The growth in circulation is evidence of the greater appreciation of the messages which our periodicals contain. We may not rest on our laurels, nor conclude that the circulation has reached a point where it may be left to itself; but its growth is added proof that the periodicals are reaching mankind with their message of healing and redemption, and this fact should give greater impetus to the increased circulation.

The purpose of these periodicals, it should be remembered, is different from that of ascular periodicals or newspapers. Our periodicals are published solely for the benefit of manifold the increased circulation.

The purpose of these periodicals or newspapers. Our periodicals are published solely for the benefit of manifold the increased circulation.

of doctor of laws were: Ernest P. Clarke, managing editor of the Daily Calif.; Henry F. Cutler, principal of Mount Hermon School, and Edward B. VanVleck 'S4, professor of mathe-matics in the University of Wisconsin, a former member of the Wesleyan faculty, and son of the late Professor John M. VanVleck, for whom the VanVleck Observatory was named. William S. Woods '95, of Upper Montclair, N. J., editor of the Literary Digest, received the honorary degree of Doctor of Humane Letters.

Upon the Rev. Clarence P. McClelland '07, of Carmel, N. Y., principal of Drew Seminary for Young Women was conferred the degree of Doctor of Divinity. Ralph L. Peck '18, Bucksport, Me., principal of the Eas Maine Conference Seminary of Bucksprincipal of the Middletown High School, were made honorary masters of arts. Miss Brazos was women at Weslevan, 1904-10, when

the college was coeducational. The commencement exercises were preceded by an academic procession across the campus. The senior speakers at commencement, competing for the Rich prize, were Paul A. Rey-Leonard B. Beach, Elmhurst, L. I. baseball game between Wesleyan and sang their songs. Trinity brought to a close Wesleyan's five-day installation and com-

mencement program. President James Lukens McCon-aughy, in his baccalaureate sermon yesterday, declared that appreciation of the "best in your fellow men" is the greatest antidote to the

BOWDOIN AWARDS · PRIZE FOR POETRY

BRUNSWICK. Me., June 8—The prize in the Bowdoin alumni poetry competition has been awarded to Wilbert Snow of the class of 1907. at present professor of English at college festivities, when with colored Wesleyan University. The contest Japanese lanterns on forked sticks First Church, Sheffield, England. was conducted in connection with the First Church, Stuttgart, Germany. which Longfellow and Hawthorne were graduated.

Twenty-five poems were submitted by alumni, whose classes ranged from 1870 to the 1920's, and who are now engaged in widely different oc cupations in various parts of the country. The judges were Robert Frost, Henry S. Canby, editor of the Saturday Review of Literature; Prof. Stanley P. Chase of Union College, and Prof. Wilmot B. Mitchell, Henry E. Andrews, Frederic W Brown and George Ray Elliott of Bowdoin Col-

Mr. Snow's poem is entitled "Thanksgiving." It gives a vivid and original rendering of an old-fashfoned Thanksgiving day on a farm on the Maine coast. It will be read by Mr. Snow June 17 at exercises to be held during commencement at the college, when Edward Page Mitchell 71, late of New York Sun, and Prof.
Bliss Perry of Harvard will deliver
addresses. Thereafter it will be published by the college.

SALVATION ARMY GREETING Salvation Army folk of Boston and New England will greet two of their international officers at a public mass meeting in Ford Hall tonight. The guests of honor and speakers will be Commissioner Henry Mapp of England, international secretary, and Col. Richard E. Holz, general secretary. Col. W. A. McIntyre, commanding officer of New England province, will conduct the meeting and the New England staff band will play.

been assigned to the Warsaw office, and will reach his new post soon after July 1.

SENIORS PLANT IVY AT MOUNT HOLYOKE

by Dr. William P. Merrill

SOUTH HADLEY, Mass., June 8 Mount Holyoke College. After gath- Fuller in a proclemation. The procering for the last chapel service of lamation follows: nolds, Newton, Ia.; Arthur W. Bro-mage, Warehouse Point, Conn., and Katherine Edie and Miss Helen Richards, marched between chains of A commencement luncheon and the laurel to the Mary Lyon grove, and

They then marched away between lines of sophomores to the east side of Student Alumnæ Hall, where they planted the class ivy. The delivery of the ivy oration by Miss Catherine Nevius concluded the exercises.

Yesterday was "Baccalaureate lunday." The seniors and faculty mism and criticism and factionalism entered the chapel in full academic garb, preceded by the two hundred members of the vested choir. The baccalaureate address was given by the Rev. Dr. William Pierson Merrill of the Brick Presbyterian Church, New York.

Saturday evening after the grand march of the alumnæ in the alumnæ fête, the seniors held what are perhaps the most beautiful of their last the groves and across the bridge to the lower lake and, gathering in canoes and floats, sang all their college songs.

TRADE AMBASSADORS TO ADVISE EXPORTERS

Mr. Dye has had wide business ex-

FOR THE SUMMER TOURISTS Beautiful Green Mountains and Other Natural Attractions as Well as the Coolidge Homestead Are

VERMONT IS MAKING ITS BID

Bringing in Thousands

BRATTLEBORO, Vt., June 8 (Special) — Carrying the message of Vermont's natural advantages; to the outside world, various organizations in the State have begun a campaign which they expect to show results this summer in a greatly increased number of visitors from other parts of the country.

Although Vermont is one of the oldest states in the Union it is perhaps the least known of the New England states. The beautiful Green Mountains traverse it from north to south, mainly in two ranges. Western Vermont and a large tract of the eastern part comprise pastoral regions but the central part is rugged and mountainous. The best soil is found on the western slope of the mountains near the border of Lake Champlain and in the valley lands of the Connecticut River.

Burlington often has been cailed "the wealthiest, finest and fairest."

Burlington often has been called "the wealthiest, finest and fairest city" of its size. The cliff on the west side affords impressive evidence that one need not go to the ocean for wild and bold headlands, for Lake Champlain beats vigorously at times against the massive crags.

Other notable places in Vermont are Middlebury and Northfield, types of American villages which rejoice in making homes for smaller colleges. The little vilage of Stowe, snuggled in the footbills of the Mount Mansfield region, offers many advantages to those who would seek to climb Vermont's highest peaks and penetrate the densely covered valleys in the surrounding mountainous region. Few Cement Roads

Vermont has few cement roads; in country-were apathetic with regard fact they may be counted on the fingers of but one hand; but it claims there is no other state which has as good dirt roads. They cut through the mountains, follow the Curiously, the greatest impetus was given to the State by one of its smallest towns in the summer of ravines and parallel the rivers; often they are tortuous and narrow but they provide an ever changing his native home at Plymouth was view and there is always the his native home at Plymouth was elevated to the Presidency. This ance that the narrow gravel road will lead to a wider, more traveled will lead to a wider, more traveled est in his home town, has done more

highway a few miles farther on. In the field of winter sports, Vermont is becoming more and more prominent. There are outing and ski lubs at Montpelier, Newport. Springfield, Chester, Bellows Falls, Norwich University and at Brattleboro, with more clubs springing up each year.

Brattleboro claims to be the pioneer in winter sports development, and is also the headquarters for the United States Eastern Amateur Ski Association, a body comprising 34 winter sports clubs in New England, New York and New Jersey. The na-tional ski jump in 1924 and the eastern ski championships in 1924 and 1925 did much to encourage interest

in winter sports and to emphasize Vermont as a winter resort. Vermont offers so many attractive locations in its mountains and valleys that it is little wonder it has life. Its attractions, seemingly not fully appreciated until within comparatively the past two years, are beginning to draw attention from

SOVIET RUSSIA SEES VALUE IN USE OF RADIO

Moscow Disseminates News, Education, and Propaganda-Popov Acclaimed

MOSCOW, May 22 (Special Correspondence)—Radio is developing in the Soviet Union by leaps and bounds. This is in line with the general tendency in Russia at the present time to take a keen interest in new natural scientific and mechanical discoveries. Moreover, the Soviet Government is quite alive to the vast importance of radio as an instrument of education, amusement and propaganda.

The All-Union speeches at the Soviet Congress, which is now taking place in Moscow, are reproduced by radio at several central points in the city, such as the Trade Union Hall and the headquarters of the Moscow Soviet and the crowds which surround the radio apparatus suggest the throngs which crowd around the bulletin boards in America during the World's Series and similar ath-

The trade unions, which play an important part in almost all branches of Russian community life, have taken the lead in spreading the knowledge of radio among their members. A radio bureau is attached to the Moscow Provincial Trade Union organization. Its work falls into the following five categories, according to a statement made to the writer by a representative of the

(1) Spreading the knowledge of radio by organizing circles and teaching the members to build their own apparatus. There are now 400 of these factory circles in Moscow Province, with 15,000 members.

(2) Organizing free consultation points in seven wards of Moscow. A radio commisssion supervises the work of these points.

(3) Helping to establish radio receivers in the villages.

Operating two radio stations (5) Organizing popular courses in radio; 1500 students attend these courses.

Moscow has five radio stations. These are the Comintern which transmits daily and employs a wavelength of 1450 meters; the Popov, which transmits four times a week with a wavelength of 1010 meters; the Trade Union, which transmits three times a week with a wave-length of 450 meters; Lubovich, which transmits twice a week with a wavelength of 365 meters; Union of Soviet Workers, which transmits five times a week with a wavelength of

675 meters. A glance through a week's proof one of these stations reeals the following features: a Wagnor concert, some of the reports at the recent conference of the Com-munist Party, and lectures designed for the peasants about forestry laws, c. The Radio Bureau maintains an experimental laboratory for self-made radio apparatus, and publishes

a weekly paper, the Radio Lover. Credit for the discovery of the fundamental idea of radio is claimed for the Russian inventor and natural scientist Aleksei Stepanovitch Popov; and the thirtieth anniversary of his discovery was recently celebrated here. Popov received little encouragement from the officials of his time, who regarded his ideas as visionary and impractical. Consequently credit for the discovery has gone to Marconi but according to the speeches and articles which appeared in connection with the Popov anniversary, the Russian natural scientist was the real pioneer in the field. A radio station and a military school have now been named after

Radio would seem to have a very promising future in the Soviet Union. The vast extent of the country makes radio especially valuable as a means of binding the separated sections more closely together. The demand for radio sets is very great, crease very greatly as the economic revival of the country permits the manufacture of importation of radio apparatus in larger quantities.

AUSTRALIA HEARD IN SWEDEN AT 3 P. M.

MELBOURNE, Vic., May 20-The mail brings an interesting report to the Melbourne amateur wireless station 3BD, to the effect that an amateur in Sweden received signals from 3BD on Jan. 18 while 3BD was communicating with stations in America. There is nothing remarkable in the distance covered, as Sweden is very little further away than England, which has frequently heard Australia. An unusual feat ure, however, is that the signals were picked up at a time corresponding to 2 p. m., Greenwich time, or shortly after 3 p. m. in Sweden. Therefore the signals must have covered a considerable distance in

Under these circumstances i would be natural to expect that the signals would have been very faint. The Swedish amateur, however, reports that they were very loud. The time of transmission from Melbourne was midnight. One suggested ex-planation of the signals being heard so clearly is that Sweden is situated close to the Arctic circle; and that the sun at this period of the year sets early in the afternoon.

box on a 5000-volt power circuit in South Weymouth, resulted in radio reception being broken up for several weeks over an area of several square miles. Trouble shooters of the Weymouth Light and Power Company searching for the interference for weeks, were attracted to a fuse box while hunting for the trouble, using a loop receiving set.

C. V. Purssell and other members of the technical staff at WEEI. the Edison Electric Illuminating Company of Boston, velunteered their services to try to locate the source of disturbance in Weymouth by using loop receivers in automobiles, together with fault locaters consisting of earphones with a fishpole attachment and amplifiers. The line from which the disturbance originated was located very easily. It consisted of nine miles of wire, carrying a 5000-volt power supply running from the central power station in East Weymouth, through the eastern section of the town, into South Wey-factory, but, also over a nine-mile factory, but, also over a nine-mile Rose M. THE gate swung on its hinges and came back with a click.

"Guess I'm about the most important thing around this place,"
It announced.

"Really?" asked one of the pickets on the fence.

"Yes. What would be the use of the fence without any gate?" laughed the rate.

"It takes every one picket can't go off on a vacation without spoiling our fence."

"That's right," agreed one of the pickets, "the fence would be of no account at all without the gate."

They all stood looking at the lovely yard which they inclosed, and enjoying the beautiful flower beds that seemed to send out smiling messages all day long. It was a joy to

DEBATERS GOING ABROAD

The Boston University debating team will go to England next sumteam will go to England next summer for a series of six debates, including meetings with Oxford and Cambridge, according to plans announced by James V. Giblin, coach. An itinerary similar to those of Bates and Syracuae teams this year is being planned for the trip to England. The trip will be of interest in view of the different styles used in England and in this country. There the Oxford system, which permits no rebuttal, is in vogue. permits no rebuttal, is in vogue. Boston University's strength has been in its rebuttal, so the team is planning to change its system to-meet the English rules.

NEW PACIFIC RADIO SERVICE VANCOUVER, B. C., May 28 (Special Correspondence)—Ships navigat-ing the North Pacific will be given a 24-hour radio service by a new per-manent radio station to be established here for the Van chants' Exchange, following success-ful experiments made by the Federal Government. Specially constructed Marconi equipment will be installed.

THE HOME FORUM

The Laughing Muse in Drama

that the tendency toward exaggeration has always been held in Collier's "Short View of the Imcheck by contemporary satire. The morality and Profaneness of the form usually taken may be characterized as the "retort courteous"; touched, and the worst features disterized as the "retort courteous";

and in pure burlesque. Earliest of a notable line was "The Knight of the Burning Pestle," writ-ten by Beaumont and Fletcher, those extremely competent collaborators of the later Elizabethan age. In this play is seen for the first time the when he is interrupted by a groce.

Opera" is interesting for its own and his wife in the audience, who sake; the lyrics are clever; the lypics are clever; the lypic are c Thereupon follows a roaring comedy which burlesques the theatrical knight-errantry so dear at the time to the hearts of London 'prentices. Its structure, cleverly adapted to the prevailing mode, was well calculated to awaken the interest which was held and heightened by skillful dialogue and absurd situation.

During the latter half of this same century, John Dryden dominated the field of the drama, as he did, indeed, most other things literary. He at-tempted to establish once for all the basic rules of the heroic drama. The basic rules of the heroic drama. The highly conventionalized action of his plays centered upon a hero of historical renown—an Alexander or a Montezuma—prodigiously endowed with bravery and honor, and pursued throughout the piece by rival ladies of marvelous beauty but divergent aims and virtue. The form imposed was the heroic couplet. Dryden arrived at a point where he patronized Shakespeare, dismissed Ben Jonson with a gesture, and claimed precedence for himself and his age-

"Wit's now arrived to a more high degree;
Our native language more refined and free."

what he stood for was the target of its wit and sarcasm. To him, under the name of Bayes, was assigned the role of chief character. Bayes meets two critical friends, to whom he suggests that they go with him to see the rehearsal of his new drama. And we are introduced to an amazing parody of the heroic plays of the last ten years. "The Rehearsal" contains the germ of Sheridan's "Critic," and more than a premonition of Gay's "Begthan a premonition of Gay's "Beg-gar's Opera." It did not, indeed, de-stroy the heroic drama, but it stirred

healthy reaction.

T IS an interesting fact in the period imposed upon the dramatic history of the English drama theory of the time a coarseness that the tendency toward exag-which called forth, in 1898, Jeremy although it has approximated at times to the "countercheck quarrelsome." This salutary influence has a result of the "Short View" and other protests, distinahaped itself both in satirical drama and in pure burlesque. consistent with the most deadly dullness.

The reaction was more clearly shown by "The Beggar's Opera," produced in 1728 by John Gay. Utilizing to some degree the machinery of the Italian opera, Gay developed an idea machinery employed so often afterward. The Prologue steps forth to make his customary announcement, when he is interrupted by a grocer great burlesques, "The Beggar's great burlesques, "The Beggar's Opera" is interesting for its own

the plot very amusing.

The eighteenth century was the age of bombastic tragedy and sentimental comedy, but it was also the age of delightful burlesque. Henry Fielding was known as a brilliant satirist before ever he wrote his Ben Jonson established the

Comedy of Manners; a century afterward the playwrights of the eight-eenth century evolved that astonish-ing perversion known as the Comedy of Sentiment. Goldsmith commented drastically upon this form of amusement: "It is of all others the most easily written. It is only sufficient to put an insipid dialogue, without as may be seen in a day's drive across. character or humor, into their the Isle of Wight. Scarcely larger mouths, make a pathetic situation or than the thatched cottages that two, with a sprinkling of tender snuggle close about them, these small melancholy conversation through the churches are distinguishable chiefle whole, and there is no doubt but all the ladies will cry and all the gentlemen applaud." The faults of the characters are forgiven because of their "goodness of heart." His practical protest was the masterpiece.

in some respects the best bur-lesque ever written. Although the lash of its satire falls upon contem-porary dramatic abuses and absurdi-pointed gables, all are the more

satire. They cover a period running from "Trial by Jury," in 1875, to "The Grand Duke," in 1896,

burlesque. The freshness and clever- there, and the present beautiful old music. And all is in such good taste. The two collaborators found a sorry state of affairs when they undertook to present satirical hu-morous comedy. Humor of the day doggerel. Gilbert not only gave hu-mor and distinction to Victorian burlesque, but he restored the literary self-respect of the English stage. His verses have genuine literary flavor; for his material he avoided the cheap and the obvious. The navy, the army, the police, law, art, letters and politics—all received thrusts from this genial and urbane hu-

Three operas stand out above the quality is quite remarkably kept up throughout. In the "Trial" of 1875, for instance, we have this example of lyrical neatness of expression from the "Judge's song":

to the Bar,
I'd an appetite fresh and hearty And I was, like many young law-

yers are, An impecunious party. I'd a swallow-tail coat of a beauti-

A brief that I bought of a booby; I'd a couple of shirts, and a collar And a ring that looked like a

In "The Gondolfers," fifteen years later, we find the Song of the Kings, which is said to have especially de-lighted Queen Victoria:

"Oh, philosophers may sing Of the troubles of a king: Yet the duties are delightful and the privileges great;

But the privilege and pleasure That we treasure beyond measure, Is to run on little errands for the

Satire of this sort, skillfully directed, I stopped inside, waiting and staying, and maintained for nearly tracted. To try to hear what the hens were and maintained for nearly twenty years, forms an achievement unstage—or any other stage, for the matter of that. Gilbert, a Victorian in taste and

feeling, assailed the very citadel of Victorian respectability. The more effectively to do this, he created a Giller feathers made a ruffled sound, bertian world of topsy-turvy. It is an atmosphere not of nonsense, but of A ruffled sound, like a bushful of atmosphere not of nonsense, but of sense turned upside down; it laughs thought into us. And the literary cachet makes his librettes an abiding joy. For the rest, it may be said that, like all great satirists, "his foe was folly and his weapon wit." And it must be added that his antire never stung.

A. B. de M.

Leave Taking

With dawn yet faint upon the hill And some late planet trembling still Far up among the morning light. I stand alone upon the height And look the last time, lingering, down

Upon the slowly awakened town.
Upon the gnarled trees and the gray
Tall steeple waiting for the day.
The misty river and the mill.
The homes of men I love, the still

Quaint crooked street of stone, And stanting fields that I have known So long, so well. Soon I shall turn, Just when red dawn begins to burn The quiet weather-cocks, and go I know not where; but this I know That years and seas shall not avail To dim this picture or to pale Its faintest hue, that West nor East Holds wonder that can blur the least Frail pattern that the rose-leaves scrawl

Shall lure me basely to forget Forever now, serene, apart, Deep in the country of my heart. I shall recall this break-of-day Odell Shepard.

Some Little Old Churches

tical protest was the masterpiece, case with the lovely hamlet of Bon-"She Stoops to Conquer." "She Stoops to Conquer."

The final blow was struck by Sheridan in his comedy, "The Critic," in some respects the best burand free."

It is refreshing to note that a bomb war exploded under Dryden's solemn temple of heroic drama. In 1672 a burlesque of great brilliancy took the town by storm. This was "The Rehearsai," a work destined to exert an influence far beyond its immediate circle. The production chiefly of George Villiers, Duke of Buckingham, it was several years in the making, and gathered by the way a rich store of satirical comment. Dryden and what he stood for was the target of its extend the same friendly welcome.

In Brixton is another very typical English church, with the usual peaked roof, low, square tower and rambling vines. The restored Nor-man arcade gives it a rich and pleasing quaintness and insures its pro-longed usage. Shalfleet village, also, has the "square and squat tower of its ancient Saxon church" which is so badly cracked that it has had to Gilbert was more original than either Gay or Sheridan. Both of the earlier writers drew more or less directly from "The Rehearsal." Gilbert drew from nothing except the fine traditions of the best English burlesque. The freshpess and elever there, and the present beautiful old

> More p tentio a than some the bold, square tower of Godshill church, shown in the accompanying was chiefly of the "slap-stick" vari-ety; librettos were largely vulgar grandeur far above the thatched cottage which hides its massive foundation and the entrance to the chapel, This ivy-decked church is placed picturesquely on the top of a pleasant knoll, in a village of oddly-built houses and quiet atmosphere. In his 'Impressions and Memories" of the Isle of Wight, Edward Thomas states that the pronunciation of the name of this interesting old church and vil-lage is "Godshill, not God's Hill," although the admirable view obtained Three operas stand out above the although the admirable view obtained rest—"Trial by Jury," "H. M. S. Pinafore," and "The Mikado"; although it would be ungracious to forget "The Pirates of Penzance," but its immortal Sergeant's Song painted the original water colerated by the property of the property and Policemen's Chorus. But the given it a glow of summer sunshine, square tower with a background of blue sky and light fleecy clouds, and has mellowed the brown thatch into buff walls and ivy greens. The happy little English family in the doorway When I, good friends, was called is all that is needed to make the pic ture charmingly quaint and human.
> The chapel of old Carisbrooke Castle, the parish churches of Newport, Shankling, Whippingham, and other places on the island all have their own interesting stories to tell all are more or less associated with English history and literature. In Freshwater Church is a tablet inscribed to the memory of Lord Alfred Tennyson, "whose happiest days were spent in this parish."

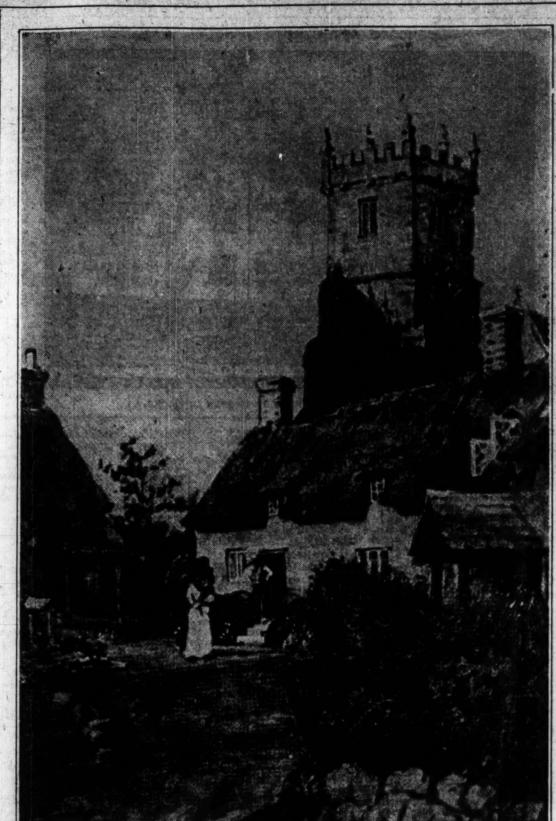

The Hens

The night was coming very fast; It reached the gate as I ran past. The pigeons had gone to the tower of the church,
And all the hens were on their perch Up in the barn, and I thought I heard A piece of a little purring word.

equaled in the annals of the English They were asking something, that was plain, Asking it over and over again.

A French naturalist has even discovered that, when one limpet was put on another limpet's place, rightful owner came up, passed the round, came back, and gradually pushed the interloper off." Much is heard of the homing in-

stincts of birds, but this faculty of the tiny, less-developed creatures like the snail and limpet for finding their way home is almost more

A Good Londoner

It is natural, perhaps, to compare

Lamb's passion for London with that of another great denizen of the Temple . . . Johnson; but beyond a common preference for the metropolis there can be no further parallel between the two. Even in this context, to be ranked with Johnson would probably be distasteful to Lamb, for his contempt for the Doctor and his works was not concealed: there was nothing oracular or mysterious in Johnson . . . and Lamb's own style represents the revolt

"My peace I give unto you"

Written for The Christian Science Monitor

'S THERE any mortal who, down | Jesus gave the method then; and deep in his heart, is not seeking peace? There is something in the very sound of the word "peace" which suggests calm and quietness,—still valleys among gently rolling (p. 329), "If men understood their real spiritual source to be all bless-sheltering shadows. So prevalent is course to the spiritual and be at So prone is the general thought because of this understanding of

of mortals to relegate peace and man's at-one-ment with the Father rest to remote scenes and far-off that Jesus knew he had power to days that the sublime promise of the Master, "My peace I give unto knew that his supply for every daily you: not as the world giveth, give I unto you." has been accepted, give I unto you," has been accepted as hav-ing little if any application to the present. Yet, our loving Way-shower ever to be disturbed amid any of the said, "Neither pray I for these alone, but for them also which shall be-lieve on me through their word." In Christian Science is revealing this

necessities of existence. That peace they are gaining their dominion over which Paul declared "passeth all all evil, and obtaining consequent understanding" seems not to have been found by these seekers, because they have sought for it in every place but the one where it may be human relationships is this great rein the heart of each one.

them and with us. How, so many are nothing that can sin, suffer, be punasking, can we find this great gift? ished or destroyed."

the association of the word "peace" course to the spiritual and be at with just such sequestered nooks peace." It is because men believe that one often hears the sigh of re-gret, or sees the shrug which indi-standing of divine Love and man's recates that such paradise is not for that lation to divine Love that they are one. His daily duty keeps him where disappointedly seeking in materiality all day long he hears only the jarring and personality for that which can noises of creaking machinery, the click of the typewriter, or the babel said of his Father and our Father,

that same wonderful prayer, in the Realizing the inexhaustible supply seventeenth chapter of John, Jesus which divine Love gives, and man's said. "I pray not that thou shouldest indissoluble relationship to that take them out of the world, but that source, men are beginning to underthou shouldest keep them from the stand that all the Father hath belongs to them as His children; and this Is there in the world today any understanding serves to give them a greater destroyer of health and joy right place in the human economy, than this unrest of mortals? And although seers, poets, preachers, and that presents itself, work for each reformers have written and spoken day, friends,—all that is good. The hopefully of a remedy, there never peace and the joy which thus come was a time since the advent of Jesus and abide in their hearts bless when so much has been written about countless others. The fears which peace as today. Yet the worried harassed them, destroying their ease frown still sits on the brow of age both mentally and physically, are and of youth; the eager, anxious diminishing; but they know that pace is still kept up; the struggle, the final destruction of these fears is too, for place, for power, for a name, assured. Through the understanding and for the luxuries as well as the of God's allness and ever-presence,

found,-namely, in the right under- generating force being felt; it is sostanding of God. Right here and now, ing out into the larger circles with where each day's task finds each its peace-giving influence. Of the inof us. God is: and peace may there-fore find a sure and abiding place standing of man's at-one-ment with n the heart of each one. the Father, Mrs. Eddy writes in The great Way-shower asked of Science and Health (p. 340), "One the Father that those who followed infinite God, good, unifies men and him might be kept from the evil that nations; constitutes the brotherhood is in the world, not that they should of man; ends wars; fulfils the Scripbe taken out of the world. He re- ture, 'Love thy neighbor as thyself;' assured his disciples that he himself annihilates pagan and Christian had overcome the world,-all that idolatry,-whatever is wrong in somakes for strife, unrest, disease, and cial, civil, criminal, political, and redeath; and he said, "Peace I leave ligious codes; equalizes the sexes; with you." He left his peace with annuls the curse on man, and leaves

carriage-owner's, or as ours is a taxicab and tube London; and to one living in the thick of it offering minucompulsory inspection.

Gay, a century before, perambu-

lated the town in the same way, and was 80 did Jo inclined to be skeptical.

Mark and number the positions of limpets on a rock. Then return when whereas Lamb's was. Lamb's was Wordsworth's London, where observation is enforced with fancy; the dazzling wares, the blazoned names, the tradesmen's honors, the shopfronts inscribed like title-pages, the allegoric shapes like guardian saints. Wordsworth's description anticipates Lamb by a few years, as Lamb precedes one who cannot but owe something to him—Dickens, who re-tained that outlook until the vision was exhausted. When the possibility is remembered that Lamb, as a child in the Temple, may have seen Dr. Johnson, whose works he grew up to dislike, and as an elderly man might have known Dickens, and might have read the Pickwick Papers if he had lived a little longer, the bridge made by Lamb as a good Londoner becomes plain .- From The Times (Lon-

place at first, then stopped turned The Song of the Peebles Pedlar

don).

As I cam' doon the water-side I heard the water on the stanes

A HALF-CENTURY **EDITION**

SCIENCE and HEALTH

KEY TO THE **SCRIPTURES**

MARY BAKER EDDY

In order to mark in a simple and appropriate man-ner the completion of a half century since "Science and Health" was first published, the Trustees under the Will of Mary Baker Eddy have authorized the publication of a Half-Century Edition of the pocket-size textbook. This edition has a title-page printed in two colors, and is bound in maroon morocco, limp, round corners, gilt edges, uniform in size with the regular pocket edition. The Half-Century Edition of the textbook will be issued in place of the black morocco pocket edition for the remainder of the year 1925.

The price of this special pocket edition will be the same as that of the regular pocket edition-namely, one copy, \$5.00, twelve or more to one address, each \$4.75.

Orders and remittances therefor should be sent to

Debt of the Public to the Artist

HAT does the artist do for he public to make it a debtor? How can the public pay that debt? In paying the debt how is the public benefited? These are some of the questions that should be answered to the public. All of life answered to the public. All of life in public buildings, in schools, in clubs, in homes. is a question of give and take. We cannot give everything. We cannot have everything. We cannot have everything. We cannot experience everything. So we must perforce be everything. So we must perforce be as we give them our attention. There is so much pleasure and joy and pictures that I hope it

There are many interesting, very in art and pictures that I hope it may be for everyone.

A nation's art is its most lasting public as a whole, and perhaps you as an individual, have not considered. Art is one of them. But I culture and history of nations hear you say—"Art is a luxury. It is too expensive. I cannot afford it."

The most art that we know of the culture and history of nations passed and forgotten; that we recreate their life, acts and customs. Art may be a luxury, but it is also necessity. The esthetic nature hungers for beautiful things and the uncultured grow gentle and refined under its subtle charm. You cannot afford to be without it, and of all entertaining and delightful things it

your walls, gives pleasure to your friends and lasts forever-because, unlike rugs, furniture and bric-a-brac, it has no wear and tear. It takes its place in the home, growing more beautiful and valuable as it mellows with time, and it enables your chil-dren and your grandchildren and your great grandchildren to point had a great appreciation for art; he was a cultured man." So, no matter what the initial cost, a good picture is never expensive.

A Cultural Need

acknowledged that three things make for culture-literature,

music and art. Literature is a record of the thoughts and actions and intentions written in words for the cultivation

Music is a record of moods and feelings expressed in sound for the pleasure of the ear.

Art is a record of sesthetic emo-

tions and feelings recorded in terms of form and color for the eye. As you must read literature and

pleasure and a profit.

DEFORE the World War the consequence to continuous and the work of artists belonging properly speaking, to Czechoslovakia among the exhibits of German or Austrian art. Ever since the new Republic has been formed its mambers have evinced great, interest in their proper national traditions, and particularly to those among us who regard national boundaries as defined rather by the homogeneity of the artistic output of a 'people than by the somewhat arbitrary delineation of frontiers which results from the decision of men of politics and statesmen, an examination of the elements which appear to underlie to and statesmen, an examination of the elements which appear to underlie to the present movement of Czech art might sorve a useful purpose.

The present generation shows not only great activity but a fair promiss of talent. Since, however, it is useless to direct the attention of the reader to a mere list of names of artists whose work might concely ably interest him, it will be necessary to go back to the beginning of the last century and follow the trend of events by which an artistic movement may be defined.

Prayeu at on the ways one of the Prague and Czechoslovakia.

The Manes Society will hardly be cause he made his contemporaries as an artist, but he at time and anticreated the made understood the special mature and appirations of his people at a time when the national containers are a time when the national containers are at time and appirations of his people at a time when the national containers are at the same when the national containers are at time when the national containers are at the same when the national containers are at the same when the national containers are at the same when the national containers are at time when the national containers are at time at the same when the national containers are at time at the same and time and of art, not only as dillimited to same time and understance and understance of painters, who have passed or are passing through the difficult ordeal of Cubist discussi

artists whose work might conceivably interest him, it will be necessary to go back to the beginning of the last century and follow the trend of events by which an artistic movement may be defined.

Prague at one time was one of the most important centers of art north

most important centers of art north of the Italian Alps, with a definite and magnificent tradition of its own. The period referred to falls between the years 1300 and 1600, and the seventeenth and eighteenth centuries, broadly speaking, wit-nessed the decline of artistic tradi-tion which culminated in 1800 in a period of decadence, so that it might be fair to say that the beginning of riod of decadence, so that it might the nineteenth century in Bohemia was barren of artistic effort of any merit. It will be remembered that the early portion of the nineteenth

country was once more beginning to A number of wealthy citizens, perturbed by such a state of affairs, established in the year 1800 an academy of fine arts in Prague, which was headed in succession by a pupil of Mengs and then by Kadlik. The first impulse which made itself felt came from Germany, and more par-ticularly from Munich, and this influence, which did not bear a rich harvest, at any rate prepared the younger generation to receive sym-pathetically the romanticist movement emanating from Paris. We then come to the fateful year

1848, which emancipated definitely and it would seem permanently the art of Czechoslovakia from German influence, and an unending stream of students has since then found its way from Prague to Paris. The who may perhaps be described as inaugurating modern art in this country appeared on the scene pre-cisely in 1848. His name was Josef Manes. He directed his talent above all to two departments of the fine portraiture and painting. As he matured he took an ever-increasing interest in the mysterious beauty of Moravian for-ests, and he sketched and studied at close quarters the picturesque characteristics of the peasant population In a modest measure Manes did for his country what David and Ingres did for France. His work is robust; his drawing subtle and pains taking without loss of vigor, and considered in his period he was a

The Rise of Modern Czech Art

Another date of great importance in the Czech movement is the year 1902, when the association above referred to had a pavilion specially built in order to house the first exhibition outside of France of the work of Auguste Rodin. In 1908 a very important exhibition was held, at which the works of Daumier, Monet, Pissarro, Sisley, Renoir, Berthe Morisot, Bonnard, Vuillard, Signac, Cézanne, Gauguin and Van Gogh were shown. Just as in the case of England the first important exhibition of impressionist and post-impressionist work brought about a definition of the many cross-currents seeking expressions at the case of England the first important exhibition of impressionist and post-impressionist work brought about a definition of the many cross-currents seeking expressionist at the case of England the first important exhibition of impressionist and post-impressionist work brought about a definition of the many cross-currents seeking expressionist and post-impressionist work brought about a definition of the first importance is the year likely that its richest harvest is to come in the near future.

11 Hollaova Parken. many cross-currents seeking expres-sion in the modern movement.

The most direct result which the historian can recail for us was the breaking away of a few of the younger members of the Manes Society, who became known as the "Eight." This little group appears, with perhaps more fervor than diacretion, to have acclaimed their own efforts as the only true continuation and expansion of the great nineteenth century movement in France. Their zeal quite normally decided them to attack something that belonged to the past generation and they turned their attention toward the Manes Society Itself. It is a significant fact, however, of the great service rendered by this association that while the group of the "Eight" found favor in the sight of the public for some time, this violent body has for the greater part returned to the fold of the older association, which to this day is the rallying point of distorian can recall for us was

EDUCATIONAL

Should Every Child Be Promoted? Answered by a 100-P.C. Promoter

The writer of the following article says that a tremendous saving of energy, money and pupil interest is gained by abolishing "Non-Promotion." Speaking for his own school, he says further:

"We have tried the scheme of 100 per cent promotions and it has worked. In these essentials the plan has proved to be impeccable:

There has been no falling off in effort; the normal pupils work just as hard and the doubtful ones harder than ever.

"There has been no lowering of the educational standards of the curriculum; those who can absorb the maximum, do to; the slow pupils accomplish as much as they can.

complish as much as they can.

There has been no tendency to shirk; the truants are all in school trying to make good, grateful for their promotion; the workers are trying to reach a higher standard.

"There has been no resistance on the part of the teachers; they have fallen int, the spirit of the innovation and if all their pupils are not up to grade what they receive them, they accept the situation philosophically and wisely sink their instruction pillars to the lowest strata of solid information."

By JOSEPH T. GRIFFIN Principal of Public School No. 114, Manhattan, N. Y. C.

hold-over were one of exact justice there would still be an attitude of rebellion and protest. But who is so rash as to declare that in every class in every school throughout the country the teacher's judgment has functioned with exact justice and every non-promoted child deserved his

tems throughout the country sys-tematic attempts have been made to reduce the evils of nonpromotion, by school officials who realize the vast economic wastage and spiritual de-terioration involved in the present system. But their efforts have been resisted by the inflexible traditions of pedagogy:
"The curriculum must be upheld;

ducational standards must not be

"The child must learn to pay the price of failure.
"Promotion is the reward for good work, nonpromotion is the punishment for poor results."

And so the whole issue has been complicated by the play of opposition forces: the according and applications forces:

ing forces: the economic and spirit-ual urge demanding the reduction or elimination of nonpromotion, and the traditional pedagogic point of view, insisting upon nonpromotion as an educational necessity.

The Ohlo Experiment The Ohio State Department of Education, according to an article in a recent issue of The Christian Science Monitor, has been experimenting with a plan of probationary premotion. Under this system all children are sent on to the higher grade, but are only permitted to remain there if they succeed in sustaining thempromotion shows that about 71 per

end of the term to make room for the others coming after you."

One Answer A certain learned judge, in com menting on our plan said that to promote children when they are not selves in the work of that grade. fit would lead them into habits of The data submitted for their trial indifference to duty, lariness, and indifference to duty, laziness, and result to 2,000,000 families through-other moral delinquencies. He would out the nation if all schoolmasters advocate keeping children back term after term "until they made good." One answer to him and to others, inside the school system and out We have enunciated the following who hold the same opinion is simply this:

1. That our experiment has proved give each pupil the benefit of eight that promoting all children does not years of instruction; it is under no result in indifference, laziness, or other moral delinquencies.

2. That holding children back has esulted in trusncy and other forms of juvenile delinquencies. 3. That our obligation to children

does not consist in loading them up with any arbitrary "percentage of knowledge acquisition," but it does consist in giving them the stimulus to acquire as much as they can of curriculum.

curriculum is not sufficiently impor-tant to justify the humiliation, the deterioration which non-promotion brings in innumerable instances. 5. That the normal child will strive harder to improve his weak subjects

under the stimulus of promotion than he will under the depression caused by non-promotion. 6-And since so many conditions extraneous to the child himself, may make his non-promotion an act of in-justice to him, our plan of 100 per

we have tried to change all of that. pupils 100 per cent guarantee agains Our attitude is:

"Here, children, is a fine school, trained teachers, splendid books, and doubtful pupils did not redeem the opportunity to learn things a forded by 100 per cent promotion. the opportunity to learn things themselves under the opportunities which will make you better men and afforded by 100 per cent promotion—women. You have the opportunity no matter how small the number who of spending one term in each of 16 did—the economic saving and spiritgrades to get as much as you can in ual gain would abundantly justify

our plan.
Who can estimate the impending disaster in the lives of 2,000,000 children who today throungout the country are labeled as school fail-Who can compute the present On the other hand, who can measur non-promotion and cease crucifying other people's children upon a curriculum cross?

Responsibility

In every direction children can be trained in a sense of responsibility through all their growing years. Very early they should learn the need of punctuality, and reliability of word or promise. They have to learn thoughtfulness for the comfort of others, playing less noisily, for in-stance, when baby is taking her nap. Even the little tots have duties as citizens of the community. It is their grounds and schools in good condi

Children who feel a sense of re sponsibility are much happier and more self-respecting than those who fn it has been made for their pleas They are much more efficient when they know that we have confidence in their capability to perform certain duties, and expect them to do so. It is the parents who need educating! The children rise nobly to almost every situation.

Teachers are the research comments of the teachers are research comments of the teachers are research comments. Special Correspo NUMBER of elementary schools search into the attainments of chilsearch into the attainments of children about seven years of age in the subjects of English and arithmetic.

The research was a purely voluntary one on the part of the teachers concerned, and was conducted in conjunction with the research committee of the Lendon Teachers' Association. The tests were partly oral and partly written, the written ones being confined to children of Typars of are 7 years of age.

words per minute the children could test. The results show a distinct advance upon those obtained 10 years ago in a similar test. For boys of 6 30.9 words per minute, as against 23 per minute 10 years ago. For girls of this age the average were 13.6 (as against 23.5). For boys 7 years 6 months the present average 48.3 words (as against 43), and for girls of the same age 56.1 (against 48). What stands out here is the fact, gratifying to the advo-cates of modern methods, that oral eading is distinctly better than it was 10 years ago.

In oral arithmetic a slight advance on 10 years ago was discovered. Boys of 7 years to 7 years 11 months reached 13.2 in addition and 9.6 in subtraction (as against 12 and 9.2). The results for girls were very sim-

Reading for Comprehension This test consisted of five printed sentences conveying instructions which children were to carry out in the space allowed on the paper. These sentences were:

(1) Put a big dot at the end of this line.
(2) Make three large crosses in (3) Draw two lines standing up and one lying down. (4) Draw a square and write fig-ure seven inside it. (5) Print your name in the space underneath.

The average score out of 10 was for boys seven and girls 7.4. The answers proved to be of extraordinary interest, owing to the remark able misinterpretations put upon the Camp Windydune questions by some of the children.
The first order—"Put a big dot at
the end of this line"—though yielding the largest numbers of correct results, produced also a crop of

PHIDELAH

"ordinary" words? Further, is not mechanical reading pushed too far at an early age? The tests show that while children can often pronounce words correctly and read with correct intonation they fail to grass. whether, indeed, children of age do not have too much re

One important fact emerged fro the spelling results, and that was that bad spelling is often caused by bad speaking. Individual methods, otherwise very helpful, are a diameter of the cause of advantage in this connection be-cause they do not bring the children, under the influence of the teacher's, voice so frequently as the old class method of teaching.

The committee noted a curious, thing in the written arithmetic. It was found that an example with, more processes, in working whick, it was obvious that the child had, been well drilled, was correct while, the one process "sum" involving the actual operation only, was, wrong. A noticeable number of children, e.g., wrote down the "table" exercise in multiplication incorrectly and yet worked a "writing, down" aum correctly. Some down" sum correctly. Some experience of those who have left school a couple of years or more makes for a certain amount of suspicion as to the permanent value of so much written arithmetic as is still the practice.

EIGHT BEAUTIFUL VOLUMES

ACTIVITY IN OILS, MOTORS AND RUBBERS

Some New High Records Are Made-Havana Electric Up

NEW YORK, June 8 (P)-Stock prices resumed their upward movenent at the opening of today's market under the leadership of the ruber, low-priced motor and oil shares. New high records were established

New high records were established by a number of the favorite issues in these groups. Large buying orders were executed for the Standard Oils of New Jersey and California and the Pierce-Arrow Motor issues. Renewed talk of further advances in oil prices due to the record-break-ing consumption of gasoline stimu-lated steady accumulation of the pe-troleum stocks.

troleum stocks.

Bullish demonstrations also broke out in various public utility and merchandising issues, with business expanding as prices rose. Havana Electric jumped more than 9½ points to a record high level within the first half hour, and May Department Stores mounted 2½ points.

At the same time gains of 1 to 3 points were recorded by Houston Oil, Pan American "B" Atlantic Refining, Coca-Colo, Norfolk Southern, Northern Pacific and Fisk Rubber first preferred.

Interest in the foreign exchanges

Interest in the foreign exchanges centered in a 6 point rally in French francs to 4.81 cents. Sterling was unchanged at \$4.85% at the opening. Selling Pressure

Selling Pressure

Professional selling was resumed later in the morning, following the marking up of the call money renewal rate to 4 per cent.

Finding that buying support was lacking for standard shares, speculators quickly threw overboard most of their pet specialties, causing a number of sharp recessions.

Weakness was most pronounced in the public utility group, despite the buoyancy of electric, power issues. General Electric was hammered down 3½ points, and Western Union and International Telephone 2 points each before noon.

American Can Guiff State Silvers

before noon.

American Can, Gulf States Steel,
International Paper, Radio, Cast Iron
Pipe, and Maxwell B certificates lost
2 to 3 points,
Oil shares, however, continued to
offer stiff resistance to selling pressure, with Pan-American, Marland,
Phillips, and Houston joining the upward procession.

Phillips, and Houston joining the upward procession.

Prices began to swing upward after attention was directed to the steady absorption of particular shares which were being taken in anticipation of favorable developments. Havana Electric climbed further to 167 and Tidewater Oil moved up 4 points. Shares of local corporations like Brooklyn Manhattan Transit, R. H. Macy and Gimbel Brothers were also bought freely.

Government Bonds Up

Government Bonds Up

Strength of U. S. Government obligations, four of which sold at the year's highest levels, marked today's early bond trading.

Buying of both Liberty and Treasury bonds was stimulated by the announcement that the June financing program called for the sale of only \$125,000,000 3 per cent certificates, the smallest issue since the war, indicating the Government's strong financial position. The Treasury 4s and 44s and the first and fourth Liberty issues reached 1925 top prices.

Most of the railroad and industrial liens pursued an upward course in the initial dealings, although the property of the sale of the railroad and industrial liens pursued an upward course in the initial dealings, although the sale of th

Most of the railroad and industrial liens pursued an wpward course in the initial dealings, although gains were moderate. Oil Company issues, benefited by a revival of buying interest in these shares, were especially strong.

FOR SECOND HALF OF YEAR FAVORABLE

Harvard Economic Service in its letter dated June 6, says in part: No pronounced change in the money situation seems to be immediately in

prospect.

The fore-runner of a major decline in the stock market—a business boom leading to unsound conditions and money stringency—has been avoided in the stock market—a business boom leading to unsound conditions and money stringency—has been avoided in while credit and banking conditions are remain strong and business men maintain their present conservative attitude there is little likelihood that boom conditions and their inevitable results will develop.

A further considerable decline of interest rates and advance of bond prices do not seem likely. The prosspect is for a period of narrow fluctuations in bonds at something like their present levels.

Clearly business has not yet entered a period of considerable expansion which would result in a withdrawal well with the would result in a withdrawal with the would result in a withdrawal work as sustained downward movement of bond prices.

The outlook for the second half of 1925 is for a large volume of business and stable or possibly rising commedity prices Ease in the money market, a large volume of current distribution and hand-to-mouth buying continue to characterize the business situation. The commodity markets have recently shown some improvement, and there is increasing evidence that the price recession has about run its

PROFESSOR Provinces. The fore-runner of a major decline

Prof. Irving Fisher's wholesale price index of 200 representative commodities and the relative purchasing power of money for the past several weeks, compared with monthly average since January, 1924, the low of January, 1922, the peak prices in May, 1920, follow (1913 being taken as

would show practically no increase on the larger volume.

Sales are now running at annual rate of about \$170,000,000, compared with \$162,715,494 in 1924 and \$75,956,-649 in 1923. Present outlook for mail of the property of

APPROVE UNITED GAS IMPROVEMENT STOCK INCREASE

PHILADELPHIA, June &—United Gas Improvement Co. stockholders, at a special meeting, approved a proposed increase in common stock to provide for a 1 per cent stock allotment to common and preferred stockholders. The increase authorized is 133,406 shares, making total authorized capital 1,654,862 shares.

The allotment is \$50 a share, and 30 cents additional to represent the accrued dividend. Stockholders of record June 12 will have the right to subscribe to the stock, payment for which may be made between July 1 and July 28.

The directors, President S.T. Roding of the stock of the st

may be made between July 1 and July 28.

The directors, President S. T. Bodine of announced, will take action to this effect at their meeting immediately following the stockholders' meeting.

Rights expire July 28. Warrants will be mailed to stockholders June 27.

Vote of stockholders approving the increase in common stock was \$10,089, all in favor of the proposition.

FINANCIAL NOTES

The New York Times financial says it is expected that Argentina will be one of the next countries officially to establish a gold basis. Bankers say that the gold situation there is such that, except in a technical sense, the country is on a gold basis now.

A Helsingfors dispatch says the Ford Motor Company is negotiating with Finnish authorities for a concession at Helsingfors for an assembly plant.

The former Gould Riding Academy at 217-219 West Fifty-Seventh Street. New York, property of Frank Jay Gould, has been sold for \$1,500,000.

The largest building in the world is planned in Chicago, to be known as the American Agricultural Mart. It will be 800 feet long. 300 feet wide, containing 3,000,000 square feet of rentable space.

The United Improvement Association.

WHEAT PRICES RALLY AFTER EARLY DECLINE

CHICAGO, June 4 (P) - Cooler weather and rains led to an early setback in wheat prices today, but on the downturns, active buying developed and rallies ensued. Opening

quotations, 1 to 2%c. lower, July \$1.67@1.68 and September \$1.63% 1.64%, were followed by some additional declines and then by a reaction of about 1%c from early bottom figures. After opening at % to 1%c off, Sep-tember \$1.15@1.15%, the corn market sagged a little more and then recov-ered to a moderate extent. Oats started at %c to 1%c down, September 53 to 53%. Slight rallies ensued.

Provisions were depressed by weak-eess both of grain values and hogs.

NEW INTERNATIONAL CEMENT ISSUE PLAN

NEW YORK. June 8—Stockholders of the International Cement Corporation will vote at their annual meeting June 19 on a proposed increase of 100,000, shares in preferred stock to 150,000, shares in preferred stock to 150,000, shares in preferred stock to 200,000 in the common to 600,000 shares, no par value.

Directors have approved proposals to acquire additional plants and property, details of which will be revealed at the meeting. Common stockholders will be offered 100,000 shares of new common at \$50 a share.

two record of 1924.

NEW YORK, June 8 (Special)—In sustaining a protest of Mme. E. Guerin, the Board of United States General Appraisers finds that certain artificial flowers in the form of small popples, made in chief value of mercerized cotton and having stems made of wire wrapped with paper, were improperly assessed at 90 per cent ad valorem under paragraph 1450, tariff act of 1922, as trimmings. The board holds that these articles are properly dutiable as artificial flowers or boutonnières at 60 per cent ad valorem under paragraph 1419.

Importers of hosiery, gloves and similar articles of wearing apparel have just received from the United States Appraiser at this port the following important notification:

"In accordance with instructions from the Treasury. Department, you are thereby notified that on and after 30 days from date of this letter (May 27), such articles as stockings or socks in pairs, each one of the pairs being alike, must be marked on each individual article to indicate the country of origin. It was also held by the department that the word 'Saxony' on hosiery or other articles of fabrics composed of wool is not sufficient to 'indicate the country of origin, and such articles, if made in Saxony, should be required to be plainly marked 'Made in Saxony' or 'Germany.'

TO HOLDERS OF SECURITIES OF

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY COMPANY

June 3rd, 1925

We advise Against Depositing Securities Under the Proposed Plan of Reorganization, We are preparing to send out an intensive analysis of the St. Paul situation which will be ready shortly. For the information of security holders who are asked to deposit under the Reorganization Plan, we are summarizing the salient features of this analysis, as follows:

The St. Paul is efficiently and economically operated.
 The St. Paul is moderately bonded and moderately capitalized.
 The poor earnings of the St. Paul are due to the rate structure.

Support for the foregoing statements is made in a comparison of the St. Paul with strong, well-operated, dividend-paying roads carrying the same type of traffic, but enjoying a different rate structure. We have selected for

Atlantic Coast Line Railroad Southern Railway

St. Louis-San Francisco Railway Missouri-Kansas-Texas Railroad

Bonded Debt Per 1,000 Ton-Miles (1924) BONDED DEBT St. Paul\$42.00 Average of four other roads...... 49.00 Difference \$ 7.00 St. Paul's Superiority, 14%

Total Capitalization Per 1,000 Ton-Miles (1924) TOTAL St. Paul\$63.00

CAPITALIZATION Average of four other roads...... 70.00 Difference\$ 7.00 St. Paul's Superiority, 10% Direct Cost of Train and Engine Service Per 1,000 Ton-Miles (1924) TRANSPORTATION

COSTS Difference \$.57 St. Paul's Superiority, 21%

RATE STRUCTURE Average Revenue Per Ton-Mile (1924)

In 1924 the St. Paul's earnings were 90% of its charges.

If the St. Paul ton-mile rate were applied to the traffic of these four roads, the results for 1924 would have been as follows: *Atlantic Coast Line ... 9% interest charges tSouthern Railway ... 87% interest charges

Dividends on L. & N. stock and interest on L. & N. Collateral Trust Bonds excluded. †1923 income account. If the average ton-mile rate of these four roads were applied to the traffic of the St. Paul, the St. Paul's results for 1924 would have been as follows:

On Basis of the Average Ton-Mile Rate of	Ĭ.	Cent or St. Paul rges ea	Per Cen St. Pa Preferred	ul	A	Cent on ill Stock St. Paul	
Frisco Missouri-Kansas-Texas	(1.379 cents)	 132	 25.72	************		12.8	
Atlantic C. L Southern Railway							

These figures demonstrate that the difficulties of the St. Paul are not due to excessive capitalization. They are due to inadequate rates.

The Interstate Commerce Commission is considering the rate structure at the present time.

No reorganization should be consummated until the pending rate applications have been decided and every effort to obtain fair rates has been made. With fair rates the bondholders would not have to make the heavy sacrifices required by the published plan and stockholders would not be required to pay so burdensome an assessment as the price of preserving their equity.

Stockholders and Bondholders are invited to communicate with us, stating the amount and character of St. Paul securities held by them.

Cincinnati 2, Boston 2 (12 innings).
Brooklyn 10, Chicago 9.
New York 6, St. Louis 2.
GAMES TODAY Boston at Pittsburgh. New York at Chicago. Brooklyn at St. Louis. Philadelphia at Cincinnati.

Timely hitting, good pitching in fact practically every quality essential to a championship team, is apparent in the play of the New York Giants in the National League, and has given them such a lead in the race that baseball fans look upon the situation as an indication of certain victory for the dication of certain victory for the Giants. Even when Cincinnati was out in front with pennant possibilities, fans in general were picking New York

Now that the Glants are ahead with with the Giants are anead with 4½ games between them and Brooklyn in second place, little doubt remains in the baseball world that the Giants will win their fifth straight pennant and thereby set a new major league record for consecutive pennants went of the leaf pennant and thereby set a new major league record for consecutive pennants won. Once in the lead the Giants have seldom been known to falter to any great extent, mainly because of their powerful reserve strength. Even the absence of Frisch and Lindstrom from the lineup has falled to cause more than passing failed to cause more than passing comment. Take men of such ability from the lineups of practically any other team in the major leagues and it other team in the major leagues and it would mean a severe setback. Kelly has filled Frisch's place with great efficiency and Groh was ready to fill in at third base with equal dexterity. Despite the good playing of the champions Broooklyn has not only maintained the fast pace but has gained on the Giants in the last three weeks' on the Giants in the last three weeks' and the fast pace in the control of the varsity crew, and 12 track stars pass out of jungletown athletics.

Three weeks ago the Superbas were Three weeks ago the Superbas were six games behind the champions. Now they are 4½. That is a gain of a game and a half in three weeks' play. Small as this may sound it is quite a feat. The teams played even in the past week, each winning four and losing two. Pittsburgh after gaining rapidly on Brooklyn and New York in the preceding week slipped somewhat in the eding week slipped somewhat in the last week, winning two and losing two.
St. Louis has been somewhat of a feature under the managership of Rogers Hornsby, winning four straight games from the Cincinnati Reds and one from New York. The Giants, howone from New York. The Glants, however, took three from the Cardinals.
Philadelphia maintained its '500 percent playing by winning three and
losing three. Cincinnati won three and
lost three. Boston, although winning
only one and losing five, maintained
its place in the standing in sixth position. Chicago won two and lost three.
The only change in the league
standing from last week at this time standing from last week at this time s the alternation of Cincinnati and Philadelphia, the latter displacing the Reds from fourth place. The slump in olithing caused the Reds to lose their

Pittsburgh opens a series with Bostoni today, which promises well for the third place holders. Boston has always had difficulty with Pittsburgh and as yet has falled to win a game against Pittsburgh. New York plays at Chicago, Philadelphia at Cincinnati and Brooklyn will try to stop St. Louis. The real attraction of the week, however, will be the series between the street and brough and brooklyn will try to stop St. Louis.

PACIFIC COAST LEAS. ever, will be the series between Pitts burgh and New York which begin Friday. With the Superbas being un able to stop the Giants, fans are look ing to Pittsburgh, last year the hard est opponent for the champions. No est opponent for the champions. No big changes are expected in the league standing during the next week but many fans are expecting to see Pitts-burgh displace Brooklyn in second place.

DAVIS CUP DATES IN AMERICAN ZONE

NEW YORK, June 8 (49)—The first round match of the American Zone Davis Cup ties will be played at Havana, Cuba, June 28, 29 and 30 between the Spanish and Cuban teams. After the Havana match, the winning team will sail for Mexico, where the second round the will be played July 16, 17 and 18 against the Mexican representatives at Mexico City. The victors in this series will next face Japan at the Baltimore Country Club

Japan at the Baltimore Country Club
Aug. 13, 14 and 15.

Japan has advanced to the semifinal round as the result of a default
by China. Both Oriental teams had
drawn first-round byes.

In the lower half of the American
zone draw, Canada has received a default from New Zealand

FOUR GAMES FOR "BIG TEN"
COLUMBUS, Ohio, June 8 (Special)—
At least four games with "Big Ten"
rivals must be played by each football
team in the Intercollegiate Conference,
it was ruled here at the meeting of the
faculty committee. To determine the
advisability of rotating football schedules a committee was appointed, composed of Dean Henry Gale of Chicago,
R. W. Aigler of Michigan and Louis
Pelzer of Iowa. Another committee is
to be appointed by Prof. J. F. A. Pyre
of Wisconsin, president of the faculty
organization, to determine the limits of
the authority and duties of the various
bodies having a hand in the administration of athletics in the Conference. This
includes the graduate-managing committee and the organizations of athletic
directors and coaches of each sport.

M. M. Stanton, new right-handed pitcher secured by the Boston Red Sox from St. Louis University, is expected to report at the Boston headquarters today, according to an announcement this morning, by J. R. Price, secretary. Stanton is an all-round athlete, having taken part in basketball, football and baseball in college.

W. F. JOHNSON RETAINS TITLE PHILADELPHIA, Pa., June 8 (P)—W. F. Johnson retained his title as Philadelphia and district tennis champion yearerday by defeating Carl Fischer, former intercollegiate champion, in the final round. The scores were 6—4, 8—5,

U. S. POLO TEAM WINS LONDON, June 8 (P)—The United States Army polo team today defeated the Hurlingham club team 5 to 4. The Eaton team defeated the United States team, 5 goals 10 4, at Ranelagh Club Saturday.

ASTON, Pa., June 3—Jonah Hal-"I", of Paterson, N. J., a pitcher, elected captain of the 1225 Lafayete ege basebali team at a meeting

Members of the Team May Now Win Varsity Letters at Princeton

PRINCETON, N. J., June 8 (7)-The agitation in favor of raising hockey to a major sport culminated in the announcement yesterday of an amend-ment to the constitution of the under-graduate athletic committee placing hockey on the same plane with foot-ball, baseball, crew and track, and providing for the varsity "P" award to members of the team next year.

It members of the team next year.

It was also voted to award the members of the junior varsity crew the insignia of a minor sports championship "P" with crossed oars.

At the same meeting of the committee insignia awards to members of the spring sports teams was announced, together with two special awards. R. G. Hills '25 of Washington received the white awarder with a received the white sweater with a black varsity "P." reserved for captains of major sports teams winning the championship of the "Big Three," by virtue of leading his track men to victory over Harvard and Yale.

The committee recommended that championship charms be awarded members of the track team, the managers and Coach Keene Fitzpatrick. Richard L. McClenahan '25 of Princeton, manager of the interscholastic track team, was awarded the minor sport championship "P" under an amendment to the constitution passed at the winter meeting of the

mmittee. The University pistol team, unde The University pistol team, unde-feated intercollegiate champions and victor over United States Military Academy, was voted the minor sports championship "P" and at the same time a resolution was passed making the highest award in the future to members of the pistol, gun and rife memoers of the pistol, gun and rine teams the regular minor sport insignia. W. B. Thulin '27 of Belmont, Mass., received the insignia "L P T" as a member of the varsity lacrosse team, while Hersey, Wellesley Hills. Mass., was awarded his straight numerals as a member of the champlonship freshman golf team.

pionship freshman golf team. Seventy-two athletes, including the versatile C. W. Caldwell '25 and Hills

Caldwell and Hills, a pair of the greatest all-around athletes ever developed at Princeton, will be missed. The former for three years played halfback on the eleven and during the same period pitched and played the outfield on the baseball nine. His ter-rific hitting has been hardly less re-markable than his clever pitching. For one season he played on the basketball team. Hills, giant football guard and track captain, was an Olympic star and in-tercollegiate shot-putting champion.

EXETER NINE BEATS ANDOVER RIVALS, 5-0

EXETER, N. H., June 8-Phillips Exeter Academy finally turned back its foremost rival. Phillips Andover Academy, at baseball, 5 to 0, here Saturday. It was the first win for the New Hampshire schoolboys over Andover in four years. Neither team hit heavily, Exeter obtaining six against Andover's five. Andover made eight errors. Exeter scored one run in the third and fourth innings and

Akron University.

COLUMBUS. O., June 8 (pecial)-The University of Michigan track team won the track and field champlonship of the Intercollegiate Conference when it scored 45% points in the twenty-fifth annual championship games held in the Ohio State University Stadium Saturday.

The Wolverines took five firsts, one second, three thirds and two fourths. The closest rival of Michigan for honors was the University of Wisconsin took only one first place, but score four seconds and placed five more men in the last places.

Ohio State was in second place until the last event, the one-mile relay, was run off. Until that time the Buckeyes had scored a total of 30½ points, while the Badgers had made only 29. In the relay, the Ohioans falled to place, while Wisconsin came in fourth, giving them two points and second place in the meet.

Three records were broken in the meet. W. D. Hubbard '25, Michigan, in meet. W. D. Hubbard '25, Michigan, in the running broad jump made a leap of 25ft., 3½ in., which eclipsed his old record, made in 1923 by two inches. He also had held the National College Athletic Association record of 25ft., 2in., which he also made in 1923. This mark is only 2½in. less than the world's amateur record made at the Olympic Games in 1924 by R. L. Olympic Games in 1924 by A. Legendre, Georgetown College, who was credited with a jump of 25ft., 6in.
P. M. Northrop '27 Michigan, by making a javelin throw of 201ft. 9'4in. bettered the mark made by M. S. Angler, Illinois, in 1923 of 198ft. 10% in.

He also bettered the intercollegiate record made by C. H. Storrs, Yale, who made a throw of 199ft. lin. H. H. Schwarze '27, Wisconsin, won the 16-pound shotput, with a throw of 46ft. 7½in. However, in an exhibition trial he made a heave of 48ft 1¼in. This made a new Conference record, the old being made in 1904 by Raiph Rose, Michigan, with a throw of 47ft. 4in. In the pole vault, R. G. Bouscher of Northwestern University made the best mark of the year when he cleared

best mark of the year when he cleared the bar at 13ft.

Hubbard in the 100-yard dash came within one one-hundredth of a second from equalling the Conference record held by W. D. Hayes, Notre Dame, who made the century in 9.7 while Hubbard traveled the distance in 9.71s.

Individual scoring honors were about evenly divided. Hubbard taking first in the broad jump and 100ing firsts in the broad jump and 100-yard dash was highest scorer with 10 points. He was followed closely, howpoints. He was followed closely, however, by his teammate, P. M. Northrop '27, who placed first in the javelin throw, third in the broad jump and tied for third in the pole vault, making a total of 9½ points.

G. P. Guthrie '26, of Ohio State, and H. H. Schwarze '27 of Wisconsin were tied with 9 points each. Guthrie took first in the 120-yard high hurdles and consend in the 220 yard low hurdles.

second in the 220-yard low hurdles. Schwarze placed first in the shotput and second in the discus throw. For the first time in any large intercollegiate track meet, the officials timed the men by hundredths of sec-onds instead of the usual method, by

fifths and tenths.

fifths and tenths.

100-Yard Dash—Won by W. D. Hubbard, Michigan; L. W. Wittman, Michigan, second; O. T. Roberts, Iowa, third; Glen Gray, Butler, fourth; H. T. Evans Jr., Illinois, fifth. Time—5.7s.

220-Yard Dash—Won by F. P. Alderman, Michigan A. C.; Glen Gray, Butler, second; William Gruenhagen, Minnesota, third; L. P. Irwin, Ohio State, fourth; O. T. Roberts, Iowa, fifth. Time—21.12s.

440-Yard Dash—Won by Herman Phillips, Butler; K. R. Kennedy, Wisconsin, second; C. F. Coulter, Iowa, third; A. O. Martin, Northwestern, fourth; J. Spence, Chicago, fifth. Time—48.9s.

Running Broad Jump—Won by W. D. Hubbard, Michigan, 25ft. 3½in.; W. H. Wallace, Illinois, 24ft. 1¼in, second, P. M. Northrop, Michigan, 23ft. 6in, third; M. T. Fell, Illinois, 24ft. 1¼in, infurth; R. F. Doyle, Michigan, 43ft. 9¼in, third; R. F. Doyle, Michigan, 43ft. 1½in, infurth; G. A. Shutte, Markey, Illin

MENDELL QUITS ATHLETIC BOARD

Retires as Chairman After Fine Career at Yale

NEW HAVEN, Conn., June 8—Formal announcement of the resignation of Prof. C. W. Mendell, chairman of the Athletic Board of Control at Yale University, was made Saturday in The Yale Daily News, which said editorially:

cosching salaries and of insistence on the highest standards of eligibility, scholarship and conduct for membership on athletic tetams. As spokesman and representative of Yale, without as well as within the university, he has interpreted the aim and spirit of Yale athletics with the full confidence and support of all his colleagues.

"On behalf not merely of its own members but of the whole Yale community whose interests it is privileged to represent, the board of control unites in appreciation of the exceptional service of Professor Mendell and its enduring significance to Yale."

SHAMROCK WINS RACE

FROM NORE TO DOVER fouling a mark in a race against four other big-type yachts at Southend-on-Sea registered her second victory of the season Saturday when she won the historic race from the Nore to
Dover. King George's cutter Britannia, handicapped by the lightness
of breeze as she had been the previous
day, never came near the leader.

Lord Waring's White Heather provided the thrill of the race by running
onto Girdler Sand. She grounded when onto Girdler Sand. She grounded when the tide began to ebb and remained stranded with a Margate lifeboat standing by in case of need. Second standing by in case of need. Second to the Shamrock was Herbert Wild's Lulworth, formerly the Terpsichore, who since her keel was recast has

YALE CREWS SHOW VIGOR IN WORKOUTS

improved greatly in speed.

GALES FERRY, Conn., June 8 (49)-GALES FERRY, Conn., June 3 (P)—
Cooler weather and a restful Sunday
put enthusiasm into the Yale crews,
and this was noticeable in the morning workouts on the Thames River.
Coach E. O. Leader took the varsity eight a mile and a half up-stream
at a low stroke and brought it back
with practice in raising a low stroke
to a sprint. The junior varsity and
combination crews were given similar combination crews were given similar

The freshman crew was taken by Coach Murphy well up river toward Norwich and attention was paid to unison in blade work and to get the men to put "spring" into the stroke.

Coach Leader also tried to smooth
off the work with the blades in the junior and combination crews, there having been a tendency to "bob" in

WANDERERS WIN AT PONY POLO

Lacey's Combination Polo Team Beats Milburn's Freebooters 8-5

University, was made Saturday in The Yale Daily News, which said editorially:

"The board of control of Tale University athletics accepts with profound regret the decision of Prof. Clarence W. Mendell to retire from his post of leadership as its chairman. At the formation of the board in 1916 he was chosen as one of its faculty representatives and as a member of its first executive committee helped in the international matches of last year in the opening event of the 1925 season, a special match for charity, held on the international Field at Meadow-brook, Saturday. This was in part due to the play of W. A. Harriman, who was omitted from the lineup of the Americans last year, but outplayed and outrode both Devereux Milburn, the captain of the all-American team, and Thomas Hitchcock Jr., another of the American stars last year. The score was 8 to 5, and after a scoreless first period, the Wanderers, as the Lacey team was styled, were never headed, though the score was tied at one all, when R. E. Strawbridge Jr., substitute on the international four, sent down a long drive near the start of the third period.

The Wanderers were on the defensive at the start, with both Hitchcock and later Milburn himself trying for scores. But each time Lacey headed off the final try, or it went aside. We web, one of the three internationalists on the Wanderers, tried for

and later Milburn himself trying for scores. But each time Lacey headed off the final try, or it went aside. J. W. Webb, one of the three internationalist on the Wanderers, tried for a goal near the end of the period, but was ridden off by Hitchcock, after Harriman had taken Milburn out of Harriman had taken Milburn out of play. The combination worked out better at the start of the second, when a combined attack gave Lacey the final shot and he put it through. In the third, Strawbridge equalized: but Webb put his team ahead later with a series of drives all alone. Harriman scored his first individual goal soon afterward, and two more were scored in the fourth by combination play, going to the credit of Webb, and Harriman, with Lacey also in the attacking formation, while Malcolm Stevenson lay back on the defense. This placed the Wanderers in the lead at 5—1 at half time.

By Coble from Monitor Bureau

at 5—1 at half time.

at 5—1 at half time.

The Freebooters, the name of the team captained by Milburn, again beday before, had been disqualified for gan to display their hardest offensive. gan to display their hardest offensive play at the start of the fifth, but after Hitchcock had scored, Harriman balanced the score once more with a long-driven goal near the end of the same period. Hitchcock shortened the lead in the sixth, in the only score of that period, but Harriman scored for the Wanderers once more in the seventh, and, though J. S. Phipps scored his first goal soon afterward, on a scrimmage Stevenson suddenly abandoned his defensive tactics, and, driving straight through the center of the ing straight through the center of the defense, sent the ball through to preserve the four-goal lead.

The winners simply held themselves on the defensive in the final period.

and this made all the desperate at-tacks of the Freebooters useless, with the exception of an attack by Straw-bridge and Milburn, which resulted in wanderers FreeBooters No. 1—V. A. Harriman.....J. S. Phipp No. 2—J. W. Webb...T. Hitchcock Jr. No. 3—M. Stevenson.R. E. Strawbridge Jr. Back—L. L. Lacey... Devereux Milbur. SPEAKER CONFIDENT Five Balloons Land OF CLEVELAND TEAM

Says Club Is Stronger in Reserves and Pitching

"We have a much better ball team than we did a year ago and should be well up in the race this year," said Marager T. E. Speaker of the Cleveland American League baseball club to a representative of The Christian Science Monitor Saturday. "Our reserve strength is much greater and our pitching is a great deal better than a year ago. Our alump of the past two weeks is not due to poor pitching, as fans might believe, but to lack of hitting in the pinches. Hitting in the pinches. Hitting in the pinches is better than heavy hitting when it comes to winning ball games.

"You may well expect to see

ting in the pinches is better than heavy hitting when it comes to winning ball games.

"You may well expect to see Cleveland do much better than it has in many seasons past. It is hard to rate us as a second-division club this year. I have had a lot of good material to work on and I have made the most of it. That accounts for the increase in reserve strength. Cleveland fell down last year because of poor pitching and little reserve strength and my efforts have been concentrated upon these two phases. "Knode and Burns have been alternated at first base regularly. The former has played exceptional base-ball for us, and although I have not used him much lately, he will get into many games before the season closes, and in case of a slump in Burns' hitting, can help out considerably as a regular, McNulty has done well enough to displace Summa in the outfield for the present at least. He is an in-and-out player and therefore I cannot say whether or not he will continue there all season.

"Sourgeon and Lutzke are likely looking third-basemen. Spurgeon has won the position at present and should hold it. I have had three candidates for second base in Sewell, Klugman." The cheer statics was received here by Carrier pigeon from Ernest de Muyter indicating that he was in difficulties. De Muyter winner of the original Gordon method to the original Gordon method in the mass a second-division club this year. The message was received here by Carrier pigeon from Ernest de Muyter indicating that he was in difficulties. De Muyter winner of the original Gordon method in the say in dicating that he was in difficulties. De Muyter winner of the original Gordon the believe winner of the original Gordon method in the mass a second-division club this year. The Balloon race trophy, is in the Beligica. The carrier pigeon from Ernest de Muyter indicating that he was in difficulties. De Muyter winner of the original Gordon method in the Beligica. The carrier pigeon from Ernest de Muyter winner of the original Gordon method in the Muyter win

"Spurgeon and Lutzke are likely looking third-basemen. Spurgeon has wen the position at present and should hold it. I have had three candidates hold it. I have had three candidates for second base in Sewell, Klugman and Fewster. Sewell has the place now.

Fewster has been out of the game for some time. Hendricks has been one of the best pinch-hitters I have had, and Lee is a most promising recruit from St. Paul. Karr is the most promising of my recruit pitchers. He has won five games for us and is one of the best hitting pitchers in the league. There is really no reason for a bad lapse by Cleveland this year, and we should recover some of our lost ground at least."

WISCONSIN ARRIVES AT POUGHKEEPSIE

POUGHKEEPSIE, N. Y., 8—Twenty-eight oarsmen of the University of Wisconsin under the leadership of Head Coach H. E. Vail, ar-

cuse University, Cornell University, and University of Washington are expected to arrive some time during the week. The United States Naval

Batterles—Link and Moomaw, Kohl-meyer, Cox and Menke.

CHICAGO WINS FINAL CHICAGO WINS FINAL

IOWA CITY, Ia., June 8 (Special)—
The powerful University of Chicago golf team won an easy victory over University of Iowa in the final dual meet of the season here, 26 to 3. Capt. K. E. Hisert 26, Chicago's No. 1 player, made the low score of the day with a 72 and scored an easy victory over W. F. Vernon '26 of Iowa. Frank Smiley '25 won Iowa's only match by defeating F. R. Miller '25, 2 and 1. The Maroon team scored an 3-to-3 advantage in the singles play and made a clean sweep of the doubles, counting 12 points. Iowa competed without the services of R. R. Peterson '25, first ranking player.

ALLEN SETS NEW MARK ALLEN SETS NEW MARK
DETROIT, June 3 (P)—Lester Allen of
Chicago established a new dirt-track automobile racing record yesterday. When
he covered the 100-mile distance in 38
minutes, cutting three minutes from the
record established by Thomas Allen at
Fort Wayne, in 1918. Samuel Rose of
Ann Arbor was second and Ralph Ormsby, Indianapolis, third.

CHARLOTTESVILLE, Va., June 3—C.
T. Castleman of Leesburg, Va., has been elected captain of the University of Virginia track team for the season of 1926. Langhorne Jones of Chatham, Va., will act as manager of the jeam.

Will act as manager of the jeam.

Geismer of Birmingham, 10.

One United States Entrans Down Near Treport-One

BRUSSELS, June 8 (P)—One of 'he two United States balloons entered in the Gordon Bennett Cup race, the S-14, piloted by Lieutenants Flood and McCormick, landed safely at 3:30 this morning near Treport, France, 17 miles from Disease.

List of Starters

The other starters were: British—
Capt. C. W. Spencer in the Miramar,
Lieutenant-Colonel Dunville in the
Banshee and Johnson in the Elsie;
Belgian—Ernest De Muyter (winner of
the original Gordon Bennet trophy)
in the Belgica, Labrouse in the Ville
Bruxelles and Veenstra in the Prince
Leopold; Spanish—Magdalena in the
Dura, De La Roche in the Hespero
Susanas and the Captain Peneranda
(balloon unnamed); French—Bienalme
in the Picardie, Blanchet in the Marco
and Latuagrand in the Charles;
Italian—Grassis in the Aerostiere,
Valles in the Trionfale and Iharis in
the Clampino; Swiss—Dr. Bachman in
the Helvetia.

The start was made in perfect List of Starters

The start was made in perfect weather, although the heat was excessive, a light breeze was blowing from the northwest. The balloonist who succeeds in keeping away from the English Channel or Atlantic Ocean

versity of Wisconsin versity of Head Coach H. E. Vall, arrived here last evening, planning to have the varsity and freshman eights on the water today for their first workout in preparation for the intercollegiate regatta, June 22.

The Badgers, making their head-quarters at the Nelson House, are the third crew to go into training. Syractics to win the race. Van Orman third crew to go into training. Syractics to win the race. Van Orman cuse University, Cornell University, and University of Washington are stations while in the air. 150,000 Spectators

BOULOGNE, France, June 8 (P) — The British balloon Elsie, participant in the Gordon Bennett cup race, was destroyed in landing today, when its guide rope caught on a moving freight train, crashing the balloon on the

Ketz '27, D. F. McCall '27 and T. Rose '27.

The G.-D.-T. golf insignia went to Capt. W. H. Taft '25, F. L. Dold '25, W. D. Gorton '25, J. M. Batchelder '26, J. H. Jenkins '26 and M. L. Joslyn '27. Eleven members of the freshman baseball squad were awarded their class numerals, as follows: Capt. A. T. Fusonie, W. F. Cowley, K. F. Graf, W. H. Haley, M. J. Lane, A. P. McLaughlin, Jr., R. B. MacPhail, J. R. Murphy, D. K. Norris, T Paige and J V. Whelan.

D. K. Norris, T Paige and J V. Whelan.

The following new college records of the past year in track and swimming were given official sanction: Track: 220-yard dash, McCall '27, 214-5s; 440-yard run, H. N. Bates '25, 492-5s.; 880-yard run, H. B. Crawford '25, Im. 55s.; javelin, R. J. Covert '27, 183ft. 9¼ in.

Swimming: 220-yard relay race (Capt. Bolles, Boughton, Woodbridge and Ballantyne), 1m. 434-5s.; 220-yard swim, H. T. Woodbridge '28, 2m. 34s.; plunge, D. M. Bogart '27, 75ft. in 38s.

SOUTHEASTERN POLO STARTS

SOUTHEASTERN POLO STARTS
PHILADELPHIA, June 8 (P)—With
six teams entered, the first round of the
southeastern circuit elimination polo
tournament starts today at the Philadelphia Country Club oval. The War Department Four of Washington meets the
Bryn Mawr Ramblers in the opening
contest. Other teams entered are the
Sixteenth Field Artillery, Fort Myer, Va.
Philadelphia Country Club, Bryn Mawr
Regulars and Rumson. The final match
will be played June 16.

Second Division Clubs Show Greater Strength in the

Past Week's Play AMERICAN LEAGUE RESULTS SATURDAY Cleveland 5, Boston 4.
Detroit 6, Philadelphia 4.
Washington 4, Chicago 1.
New York 11, St. Leuis 3.
RESULTS SUNDAY

Although Philadelphia still leads the Although Philadelphia still leads the American League clubs as the eighth week of play opens, its margin has been somewhat reduced by Washington since last Monday. The pitching of Johnson and Coveleskie for the Senators coupled with timely hitting has enabled the champions to gain a half game on the leaders during the

GAMES TODAY

has enabled the champions to gashalf game on the leaders during past week by winning four and to three. The Athletics won three lose three.

The second division teams she a tendency to pick up a little, thering the belief of Manager Nof Philadelphia and Manager Specof Cleveland that a tighter thould be looked for in the Ameri League than the early season ping would indicate. New York next to last place won four and three; Detroit won three and three; Boston in last place did as as the Athletics with three wins a three losses. Cleveland and Chical three losses. Cleveland and Chical three losses. as the Athletics with three we three losses. Cleveland and twere the only two teams to locentage in the standing, each winning two and losing four week's play showed that street in the account division.

and University of Washington are expected to arrive some time during the week. The United States Naval Academy plans to come here June 14. This will complete the field of starters. Coach William Haines gave his Columbia University oarsmen the longest rest they have had since they started training last Sunday. He took the varsity over the course at noon and directed his attention to coordinating the men. They are new to the boat after the shakeup Saturday. When he returned to the boathouse he seemed pleased with his charges and gave them the remainder of the day off.

J. C. Rice took his University of Pennsylvania oarsmen for two eightmile rows, one at noon and another at 7 o'clock. He kept the pace well below 30 beats and raced the men only on the return to the boathouse during the evening spin. The water conditions were almost ideal.

HEIMACH RETURNS

HEIMACH RETURNS

PHILADELPHIA, Fa., June 3 (P)—
Heimach, one of the star pitchers of the league-leading Philadelphia Athletics, is again ready to take his turn in the box. For a week Helmach has been limbering up his arm in brief workouts, and yesterday he pitched three innings in an exhibition game against Villanova College, holding his opponents to two scratch hits. Manager Connie Mack said Heimach would be a "most welcome" addition to his pitching staff. He will be used for relief work at first. Gray expects to be able to resume his work on the mound in two weeks. Gray has not lost a game this season.

U. S. ARMY FOUR LOSES LONDON, June 8 (P)—Eaton policam defeated the United States Arm leam. 6 goals to 4, at Ranelagh Clusaturday in one of a series of practice matches preparatory to contests between the British nd American Arm

NOVEL FALL SHOE STYLES HOLD INTEREST

Boston

Footwear Market Generally Dull—Leather Prices Are Firm

48c. The lighter weights range from 5 to 10 cents under the saleable skins used in men's shoes. The calfskin market is fairly steady. The only skins to disturb things may be the accumulation of the lighter weights.

Trade conditions are never so dull but what side upper leather tanners get a daily demand. The call now is limited but quotations vary First quality colored chrome sides are firm a 28-30c mixed tannages, good grade, 24-28c. The lower grades are pretty well sold up, prices ranging from 16-20c. There is a fair call for elk tannage, heavy No. 1 selections bringing 28-30c, mediums 27-28c. The lighter weigths are quoted at 25-26c. Bark and combination tannages are in line for a lively demand just as soon as cutting starts, so prices are un-changed from those last quoted.

Patent Leather Dull Japanners of Philadelphia and Boston have run into a dull spell. Buying is practically restricted to lots for immediate use. The call now centers around the cheaper grades, also for stock from 20 to 30c. Standard grades, however, are firm at 38@42c. The upward swing in raw stock prompts dealers to predict no slump in prices of shiny leather, which is quite probable, as the demand for fall footwar will doubtless call for large ton have run into a dull spell, Buying

footwear will doubtless call for large lots of patent leather in all its vary ing grades.

This mid-season dullness strikes glazed kid tanners adversely; even the movement of the lower grades seems to have fallen below the demand usual during June. The cheaper grades get the bulk of the call in spite of extraordinary grades get the bulk of the call in spite of extraordinary exploiting. therefore the situation is likely to continue unchanged during the coming fall business. Top selections of black and colored skins are quoted at 65@70c. The cheaper grades, ranging in price from 16c to 20c. are well sold up with a demand still active. Export business for the last 10 days has been very satisfactory, so compared to the statement of the statemen has been very satisfactory, so com

Feng Yu-hslang, since his capture of Peking last October and the twenty-four-day rule of

China's "Christian" General in a New Rôle

the government he set up, has turned from war to the pursuits of peace. Just how long the interests of the "Christian" marshal will find diversion in nonbelligerent activity it is difficult to say. Peace in China is

so uncertain a quantity that forecasts are more than ordinarily hazardous. At the present time, however, there is no denying the fact that General Feng is hard at the task of beating his swords into plowshares in the furthering of a great colonization scheme that he has undertaken in the vast and thinly populated territory to the northwest of Peking and on the edge of the Gobi Desert.

Early in this year General Feng, in lieu of a dictatorship in Peking, accepted the post of Defense Commissioner of the Northwest Frontier, with headquarters in the city of Kalgan. This territory is of empire dimensions. It comprises the provinces-some of them only loosely joined with China proper-of Chahar, Suiyuan, Kansu, Inner Mongolia and Chinese Turkestan. To the south of this "open country" are the overpopulated provinces of Chihli, Shansi, Shensi and Shantung. General Feng has turned his army of fighting men into one of agriculturists, and by their pioneering he hopes to open the way for a vast inflow of people from other sections of China to populate this uninhabited territory.

This is more than an idle day dream of a temporarily unemployed warrior. Those who are familiar with the country to the north and west of Kalgan, beyond the Great Wall, assert that there are almost limitless possibilities in the development of the land. The winters, throughout much of this territory, are milder than those of Siberia. The growing season, as a result, is considerably longer. General Feng is reported to have pictured the future of his empire as giving promise of an Oriental repetition of the history of the American and Canadian west, with the settlers, in this case, wholly Chinese, drawn from the less promising and more densely populated districts of the country.

It is said that the chief impediment to the program of General Feng is the customary shortage of funds. The maintenance of armies is not a profitable undertaking in any part of the world, and Feng's capture of Peking did not, apparently, net him a fortune. To find temporary relief from financial difficulties General Feng has organized a bank in Kalgan. Here, so it is reported, he may follow the precedent established by the Manchurian war lord, Chang Tso-ling, and print money of his own against the day when a more substantial supply of gold is at his disposal. Meanwhile-so reports from Shanghai state-representatives of firms dealing in agricultural machinery are giving much attention to General Feng. Just what results have actually come from their activities has not as yet been made public.

General Feng's interest in agriculture, it must be said, may turn out to have a genuine political significance. No qualities appeal to the Chinese more than those of honesty and unselfishness, and no qualities have been more sadly lacking in many of the men who have influenced China's history in the last few years. General Feng voluntarily retired from Peking with the avowed purpose—so he expressed it—of furthering the interests of peace. Strangely enough he profited little, from a personal point of view, as a result of his coup. If his colonization scheme goes forward it is altogether probable that, in turning from war to this task of peace, he will establish himself, above other military leaders in China, as the Nation's "strong man." Whatever its political significance, however, the plan to "open up" a new empire on the fringe of China has possibilities of more than passing interest.

There is no question that the American Commission on the Rights of Religious Minorities

The Religious Minorities in Transylvania

was actuated by nothing but the best of motives in its review of the situation of the minorities in Transylvania, conducted in 1924. And it would appear to be equally evident that the Rumanian Government

is anxious to accord to these minorities, so far as possible, every reasonable consideration in the conduct of their affairs. It may be recalled that the rich province of Transylvania, roughly 22,000 square miles in area and formerly the southeastern portion of Hungary, was ceded to Rumania by the Trianon Treaty, which guaranteed minority rights. Hence, the four churches, which had constituted the main ancient religious denominations supported by the Hungarian Government (in much the same way that the British Government supports the Anglican Church), namely, the Lutheran, the Reformed the Roman Catholic, and the Unitarian, found themselves under the Government of Rumania, with their main dependence for proper treatment upon the clause of the treaty mentioned.

The commission had a by no means easy task to fulfill, and appears to have achieved its aim successfully, according to the official report of its activities just published. It was granted every possible facility for both convenience and information by the high Rumanian ministers of state, but owing to the fact that it wished to proceed with its investigation independently, it declined to be accompanied by Rumanian officials or interpreters. This refusal was accepted with good will, and thus the commission

was left entirely free to follow its own methods. The report, which consists largely of a statement of alleged interferences with various rights and privileges claimed by the minorities, includes answers specifically given to the many charges of unfair treatment. Most of these seem to be satisfactory, and the assurance is given of correction of abuses which are found to be actually existent. It is stated that in the case of certain stated wrongs, which were submitted by the commission at the close of its investigation and admitted to be true by the Government, a promise that they would be immediately at-

tended to was given by Mr. Duca, the Minister of Foreign Affairs, who spoke on behalf of Mr. Bratianu, the Prime Minister.

Mr. Duca's statement to the effect that it was his conviction that the future stability of the Rumanian State depended upon the loyalty and contentment of the several minority groups, and that hence as a matter of public policy the Government intended to do everything within its power to make the minorities willingly and loyally a part of the Rumanian State, sounds more than reasonable. Glving due credit for the inevitable clash of personalities incident upon a change of government such as occurred in this instance, it would appear that the religious minorities in Transylvania have little to fear concerning their future.

Secretary Hoover, of the Department of Commerce of the United States, probably has had, since the first years

Reducing Waste in Government of the last war, a wider experience in practical conservation and in the elimination of waste, than almost any other individual one might name. Many times, and in difficult circum-

stances, he has been able to prove the practicability of methods which he has adopted. He generously acknowledges that in these undertakings he has frequently been aided and assisted by the counsel of practical men of affairs. In a recent address delivered at the thirteenth annual meeting of the Chambers of Commerce of the United States he sought to point out the processes by which methods of economic conservation, more or less familiar to the delegates whom he addressed, might satisfactorily be applied to governmental departments.

Starting with the hypothesis that co-ordination and organization are essential in business, Secretary Hoover declared them to be highly essential in government. Lack of co-ordination in business and industry is at once reflected in higher prices; in government it is reflected in increased taxes, first of all, in waste, and in lessened confidence in the administrative power. The speaker, possibly realizing the ineffectiveness of any attempt to reform governments or business by even the most impassioned appeals to public thought, said he found his effort to be one of those "in which stimulating oratory is about as serviceable as a sermon on high volt-"It contains," he remarked, "about the same proportion of humor and good cheer as a reminder that we have to work when the trout

It is interesting to trace, as the speaker somewhat briefly outlined it, the gradual development, perhaps almost unnoticed, of a governmental system, especially in its administrative branch, quite different from the closely co-ordinated system established by the framers of the Constitution. Conceding, as the facts would prove, that there has been no intentional usurpation of power or authority by any of the three basic institutions, the legislative, the judicial, or the executive, it is admitted that, because of the tremendous and rapid development of the country along industrial and commercial lines, the tendency has been to shunt onto the latter of these some of the functions of the other two.

This, by no logical method of reasoning, could be cited as an example of that complete coordination which is contemplated by the language of the Constitution. It is a manifestation of exactly the reverse. Perhaps much that is said regarding the tendency toward centralization of government may be explained by what Mr. Hoover regards as the wholly unauthorized and inexcusable assumption of semi-judicial and quasi-legislative functions by many of the newer bureaus, commissions and boards which have been created to expedite, under loose administrative authority, the extraordinary duties which have been assigned to them. Mr. Hoover does not attempt to conceal that this has resulted in irreparable wrongs. "The dangers of oppression in these matters are not merely a theory," he declares, "they are a fact."

Mr. Hoover does not intimate that the difficulties which he points out are insurmountable. Indeed, he believes they can be overcome. The mere enumeration of them should be sufficient to compel whatever action is necessary to bring about that reasonable co-ordination which will insure a proper functioning of all governmental agencies. The need, he says, is three primary reforms. He summarizes these as follows: "First, to group together all agencies having the same predominant major purposes under the same administrative supervision; second, to separate the semi-judicial and the semi-legislative and advisory functions from the administrative functions, placing the former under joint minds, the latter under single responsibility; and, third, we should relieve the President of a vast amount of direct administrative labor.'

American trade associations have recently directed the attention of the business interests

Is Installment Buying Bad for Trade?

of the country to the growing practice of consumers in buying a variety of articles on the installment plan, under which a relatively small initial payment is made at the time the goods are delivered, and the

balance in a series of payments at regular intervals. In some quarters the theory is advanced that this system of selling is partially responsible for a slackened demand for certain staple commodities, and it is urged that the best interests of the consuming public, as well as those of manufacturers and merchants, would be furthered by a substantial limitation of deferred payment purchases.

Viewed from the standpoint of economic fundamentals, the claim that the amounts paid at regular periods for goods that have reached the ultimate consumer limit the general purchasing power, and thus diminish productive industry and trade, does not appear to be well founded. The manufacture of the articles bought on the installment plan gives employ-ment to skilled labor, and the wages paid quickly find their way into the channels of general trade in payment for food, clothing and other necessities. If the accepted doctrine that the total volume of a country's trade is limited by the consumers' ability to buy is sound, it would seem manifest that the aggregate of sales must be practically the same, regardless of whether the money goes for shoes, clothes, radios, furniture, or pianos. Some industries and some merchants may suffer from a diversion of the public's spendings into particular channels, but others profit, and the net result is that no matter what goods are bought, labor and capital are equally employed in their production and distribution.

In opposition to the installment system, it is arged that its tendency is to promote the sale of articles that are of doubtful benefit to the purchaser, leaving just so much less money for what are regarded as necessities. The attempt to draw a hard and fast line between luxuries and useful goods has never succeeded, for the reason that what some persons may regard as a luxury, others consider necessary to their pleasure or comfort. In so far as the great mass of commodities offered for sale are concerned, a strict classification as essential or nonessential would seem to be impossible. It may be that the encouragement to overbuying through deferred payments may lead to unwise expenditures, but that is a matter for individual decision that can only be prevented by lessons in the hard school of experience.

A well-known writer once said that, until Corot painted the twilight, it did not exist. At

The Gift

of

Art

first glance this may seem a gross exaggeration of fact, but closely considered this truism is indeed, of valuable assistance in getting down to the root of that ageold query—"What price art?" On analyzing this

somewhat startling aphorism, however, it becomes plain that, until this French painter turned'up with his bursting sense of the compelling beauty of advancing night, no one else had ever made such a pictorial to-do over the soft and subtle qualities that nature manifests in her moments of nocturnal transitioning. While other artists before him had sensed the quiet beauty of twilight and dawn, had given voice in many a couplet and canvas to their lyric joy at this ageless miracle, it remained for Corot to reach the very peak of praise over this daily veiling of things terrestrial, over this nightly transformation from staring fact to floating fancy.

In the long succession of delicately modulated landscapes that bear this famous painter's name is found the whole matter of dawn and twilight so succinctly summed up that, ever afterward, this particular phase of nature has been an open secret for all men to understand and appreciate for themselves. Out of this painter's appreciation and gratitude, out of his ecstasy and homage, came this seeming revelation. He fixed the fleeting effects of graying skies and melting foliage in a secure and lasting web of tone and color. He made it possible that others, noting these signposts he so ardently set up, should follow him in his rhapsodical flights and come to know in turn what he had discovered. Only the deepest feeling for natural beauty could have given him the clue to what had always lain so abundantly at man's feet.

Herein is summed up the great gift of art; that just as Corot became the acknowledged spokesman for one special aspect of beauty, so each artist in turn uncovers some other variation of the eternal theme, some sign of confidence in a universe so full of wonders to the seeing eye. Each searcher for fresh beauty is another link in the universal chain of art. As Browning so aptly puts it, "He lends his mind out," making visible that which to others is unseen. From out the great cosmic storehouse of beauty are these treasures brought forth one by one; to each artist his particular gift. Without the Rembrandts, the Velásquez, the Titians, the world would be irreparably the poorer. Minus the great legion of artists that have sprung up in every age and clime, the history of mankind would be a colorless affair, a prosaic record at best. Art is a free gift, a boon that opens the unseeing eyes, that touches the heart to higher concepts. It preaches a gospel of tolerance and mutuality, of a kinship beyond race and creed. Giving in the name of art and beauty is true giving indeed.

Editorial Notes

One cannot help shedding a metaphorical tear at the demise of the Villager, that bi-weekly four-page publication which for eight years has flourished under the guidance of Samuel Strauss. It was a periodical almost without any competitor; for it ran no advertisements and was simply devoted to the aim of being a "journal of reflection," the quotation at the top of the first page reading, "And he drew a little aside, the better to observe them who went on the highway." The Villager reached its four hundredth issue before suspension, and many have been the subjects handled upon those compact four pages in judicious, humorous, individual manner. For the Villager was nothing if not a little out of the ordinary. Though written many years before, Charles Churchill's words in Gotham might well constitute this paper's epitaph:

The villager, born humbly and bred hard Content his wealth, and poverty his guard, In action simply just, in conscience clear, By guilt untainted, undisturbed by fear, His means but scanty, and his wants but few, Labor his business and his pleasure too, Enjoys more comfort in a single hour Than ages give the wretch condemn'd to power.

Half a billion dollars is no mean sum, especially when it represents an increase in savings deposits in a year. According to the latest announcement of the United States Federal Reserve Board in this connection, the aggregate savings deposits reported by some 900 banks distributed throughout the country showed this increase from May 1, 1924, to May 1, 1925. Is it unreasonable to see some connection between such an incident and the fact of prohibition? If the same thing were reported from some country in which liquor drinking had replaced prohibition, how eagerly the wets would parade it as positive proof that liquor drinking improved the economic conditions of the country. What is sauce for the goose is sauce for the

The Diary of a Political Pilgrim

Usually the British, as a nation, are interested in politics. At this moment, however, interest in politics is at a very low ebb and attention is absorbed in what has been described as the dismal science, economics. Britain's political position has been very bad. Not all the rejoicings over the return to the gold standard can disguise the fact that, six years after the armistice, there are still 1.250,000 unemployed in Great Britain, and that the demoralizing system of the dole appears to be the only alternative to leaving great masses of deserving people to starve.

During the last six months a very serious economic stock-taking has been going on behind the scenes. It has been undertaken by Government departments, by members of Parliament, by banks, and by professors and economists. But much the most important inquiry has been that jointly conducted by the employers and the trade union leaders in the great trades, such as coal mining, shipbuilding, fron and steel and textiles, which have been most affected by the depression.

For the first time, perhaps, the employers in the major.

There is no likelihood whatever of the extramists ob-

For the first time, perhaps, the employers in the major industries of the Nation have really taken the leaders of the workers into their confidence about the position of their businesses and the trade unions have abandoned a mainly combative attitude, so as to consider, in a re-sponsible way, what the problems which confront the

employers really are.

The outcome is by no means clear as yet. The faquiries and negotiations are still incomplete. But the most important result has been the effect which the discussions are having upon the attitude and policy of the trade unions and of the Labor Party.

From the national point of view the Labor Government which held office under Ramsay MacDonald last year was a considerable success, especially taking into account the total lack of experience of the great majority of its members. Its foreign policy was excellent, until the signing of the ill-fated treaty with Russia. Its administrative work, though undistinguished, was adequate.

But from the purely labor point of view it was a great failure. It was unable to carry out or even to begin to carry out a single one of the great reforms which Socialists had hoped for and promised. It did nothing whatever to bring about the Socialist millennium. The result, not unnaturally perhaps, has been the almost total eclipse of Mr. MacDonald and his more moderate colleagues in the Labor world since November last. For the moment they count for hardly anything either in Parliament or in the

With the discredit of the moderates, the left wing advanced to take charge. The extreme section of the Labor movement had said all along that nothing could be accomplished by ordinary political methods, and that direct action on the united front by means of strikes and international action was the only road to the millennium which the worker desired.

So, despite the evidence of the election that public opinion did not like too close association with Russia, the left wing sent the trade union delegation to frater-Russian trade unions, and initiated the policy of making great demands upon the employers for better conditions, and of trying to force compliance with their demands by joint strike action between the leading

The result of the last six months' experience, however, has not been very encouraging to the extremists. There has been no popular response to the demand for closer relations with Russia. And the joint inquiries into the depressed industries have revealed beyond dispute that

least with the ruthless use of the legislative machine by a Socialist majority in Parliament.

There is no likelihood whatever of the extremists obtaining a majority for their policy, either in the unions or in Parliament. There is a growing feeling that, whatever the ultimate solution may be, Mr. Baldwin's present-day advice that Capital and Labor should "get together" and find the way through the present slough of economic despond in co-operation, and not in antagonism, is the only practical course.

But the quarrel between the right wing and the left may have far-reaching effects upon the political life of the Nation. Will the two sides continue to work together? If Labor splits, will moderate Labor join with the Lib-erals? It is much too early as yet to say.

Lord Allenby has resigned the High Commissionerably in Egypt, after running his full term. He was the hero of the famous campaign against the Turks which resulted in the freeing of Palestine, a campaign which, from the military point of view, was one of the most dramatically

successful in history.
Since 1919 he has shared with Zaghlul Pasha the lim

Since 1919 he has shared with Zaghlul Pasha the limelight in Egypt. He came to sympathize with the Egyptian desire for independence, and it was his action in threatening to resign if it was not conceded that led to the present settlement with Egypt.

It is said that in later years he has become less confident that the Egyptians are yet able to maintain a siable government, and he certainly supported the strong measures taken last autumn, after the assassination of Sir Lee Stack, which led to the overthrow of the Zaghlulist Party and the entry of the present moderate government of Ziwar Pasha into power.

sir Lee Stack, which led to the overthrow of the Zagalulist Party and the entry of the present moderate government of Ziwar Pasha into power.

Lord Astor's bill to enable peeresses in their own
right to sit in the House of Lords came unexpectedly
near to success. It was only defeated by two votes. And
the case for it was really conceded by the Government,
for the principal reason which was adduced against it
was that a Cabinet committee was considering the reform of the House of Lords and that the question of the
equality of men and women ought to be dealt with as
part of the larger issue and not piecemeal.

The question is not of great intrineic importance, for
the number of peeresses in their own right is very small,
about a dozen. The really interesting thing is what the
Government will propose to do with the House of Lords,
itself. Its present composition is universally admitted to
be a hopeless anachronism. But no two people ever agree
on what alternative second chamber should be put in its
place.

The World's Great Capitals: The Week in Moscow

Moscow, May 12

Moscow, May 12

Moscow, May 12

of the Soviet Union. The cars cease to run; the restaurants are tightly closed; and a large part of the population takes part in a huge parade to the Red Square. This year the first of these holidays went off very much in the customary manner. War Commissioner Frunze recited the oath of the Red Army soldier, and the new recruifts in the Red Square repeated it after him. Along with a number of Soviet leaders, the members of the vomen's trade union delegation took place on the reviewing stand. On the opposite side of the square streamers were spread out with greetings to the women's delegation and to the British workers as allies of the Soviet trade unions in the struggle for unity of the trade union movement. The city was gayly festooned and decorated; perhaps the most striking achievement in this field was the illumination of the entrance to the Trade Union Hall with 700 colored lamps, which formed a design of the hammer and sickle, together with words greeting the First of May.

A colored visitor is always certain to get an enthustic welcome in Moscow. The Negro poet, Claude siastic welcome in Moscow. The Negro poet, Claude Mackaye, held the forefront of literary and social attention when he visited Russia in the fall of 1922. More recently an American Negro named Davis addressed the Moscow Provincial Soviet Congress. He claimed to be "a representative of the most oppressed and down-trodden people of the world, the American Negroes." The congress gave him a hearty round of applause; and his picture now appears on the cover of two of the most popular Moscow illustrated magazines. One of the pictures shows the Negro shaking hands with a typical Russian peasant: a symbol of the Communist ideal of uniting the Russian workers and peasants with the darker races which are considered oppressed.

Quite recently "the week of the red flower" was observed in Moscow. Young people sold red flowers in the streets for the purpose of alding the "bezprizorni" children, or waifs. There are still large numbers of quite destitute homeless children, the products of war and famine. They roam about the city streeets in and live largely by begging and stealing. Many of them are addicted to drugs; and in general these "bezprizorni' children are recognized as one of the most serious socia problems which Russia is called upon to solve. Even when they are gathered off the streets and placed in children's homes it is difficult to keep them, because of their vagabond habits. One method of reclaiming these children is to establish combination agricultural schoolcolonies in the country districts, where the children are brought up in a more wholesome atmosphere and freed from the degrading influences of the city streets.

The Fourteenth Conference of the Communist Party, which has just ended here, was noteworthy because of the complete absence of party politics from the subjects under discussion. The party conference last year was 'Trotzkyism." but Trotzky's name was scarcely mentioned in the conference which has ended, and the question of internal party controversy was evidently regarded as a closed subject. More or less technical economic questions absorbed a good deal of the atten tion of the conference, and the problem of the new party policy in the peasant villages came in for a considerable munists have not always understood how to apply the policy of employing more persuasion and less force in the relations with the peasants. The conference emphatwo points: first, that the new policy was i political maneuver, but a sincere attempt to establish a new form of relationship with the peasants; and, secondly, that there is no intention of giving up the leading lem is to carry out this rôle of leadership by methods which are not unpalatable to the peasants.

There is such a wide gulf between the play "Pollyanna" and the products of the classical Russian novelists that it was somewhat of a surprise to see "Mary Pickford in 'Pollyanna'" advertised among Moscow's motion picture attractions. However, it is quite possible that "Pollyanna" may strike a more congenial che present-day Russian consciousness than would have be present-day Russian consciousness than would have been the case a generation ago. The prevalent literary fash-ion is to reject Dostolevsky as "out of harmony with the times" because of his introspective mysticism and the somewhat pathological character types which he depicts, and to sneer at the "bourgeois waverings" of Turgenieff's heroes and heroines. What is demanded in contemporary

Russian literature is action, unaccompanied by loo much thought and discussion. Now Pollyanda is a creature of action; and she never seems to have been touched by the internal self-questionings which haunt so many of the Russian actional characters. So it may be that she will escape the censure which is meted out to Dostolevsky and Proventies.

A proposal has been laid before the All-Russian Soviet Congress, which meets this week, to insert a clause in the Russian Constitution granting to Russian and foreign citizens, individually and in groups, the right to apply private initiative in developing the productive resources of the country. While the interesting formal recognition of an existing fact, it is interesting as the first constitutional recognition of the ideas of the New Economic Policy.

The Moscow theatrical season is now drawing to a close. The Art Theater has already closed its doors and departed for Tiflis, where all the seats for its ten days' engagement were sold before its arrival. Its studios, however, are still playing, including the Musical Studio, which may visit America next fall with its repertory of product and lively musical compeller.

The plight of the horseless peasant constantly comes up as an obstacle to the agricultural reconstruction of the country. It is estimated that about 40 per cent of the peasants in the Soviet Union have no horses. The nat-ural increase in the number of the country's horses proceeds slowly and only a very small propos these horseless peasants have been organized in agricultural communes or collectives. It is now proposed to relieve the condition of these peasants by importing horses from Mongolia and western China.

Letters to the Editor

Brief communications are recicomed, but the editor must remain solo judge of their suitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions presented. Anony-mous letters are destroyed unread.

"General Von Hindenburg's Election" To the Editor of THE CHEISTIAN SCIENCE MONITOR:

I read your editorial in the Monitor of April 28: "General you Hindenburg's Election," with great interest, and I can well say that every Democrat and genuine Republican shares the opinion expressed by you regard-ing the result of the election. The fact should not be overlooked, however, that the number of votes cast for von Hindenburg is less than the number cast for Dr. Marx and Thälemann together. Accordingly one rightly say that the majority of the people are democratic and anti-militaristic in their sympathies.

It does, indeed, seem even to us many times as if the German mentality had remained unchanged since 1914, as you write in your article. But whoever has the op-portunity of becoming more intimately acquainted with the German people must admit, however, that there have already been many changes.

I had the opportunity of attending a public dem stration of the German Peace Association, at which almost 2000 people were present. The question "Hindenburg as president—and what then?" was the occasion for the demonstration.

Genuine democrats such as Schücking, Oesterreich, Quidde, von Gerlach, and others spoke, and it was in-spiring to see with what clear insight and moral courage these men pictured the prevailing political situation conditions in Germany, how they were permeated by the desire for peace and the sense of understanding between nations, and how uncompromisingly they expevils of militarism.

The audience rewarded each individual speaker with prolonged applause. Such demonstrations were not permitted before the war, it should be remembered, and they show that the eyes of a great many people in Ger-

many were opened by the war.

Even if to outward appearances the masses still seem unteachable, and even if again a Hindenburg was elected president because of mass feeling, still the age of true democracy has begun in Germany also, the age in

which a people is reaching its maturity and majority.

These appointed and chosen ones, these valiant, unselfish champions of democracy and peace keep faithful watch—not at the Rhine—but over those who would seemingly like to place themselves as obstacles in the way of the continuous progress of the democratic idea in Germany.

"A GERMAN WOMAN-DEMOCRAT."
